"Save the Lakes" (STL): Endorsement for State Support to Combat Aquatic Invasive Species

RI Lakes are in trouble, threatened by non-native aquatic invasive species (AIS). First documented in 2012 by a DEM State survey, invasive plants grow quickly, spread easily from lake to lake, are harmful to natural plant species, expensive to treat, and can overtake and destroy our lakes & ponds. STL is seeking your signature NOW to urge RI's elected officials to take action: to pass legislation and provide funding to help RI lakes combat AIS.

Let your voice be heard by completing this survey urging financial support to help to save our lakes. Every reply counts, and your response helps raise the volume.

Please forward this list, whether fully or partially completed, to: ***Judy Colaluca, President, STL, 61 Wood Rd., Chepachet, RI 02814***
