- Use the spacebar to use your voice to talk to ChatGPT, instead of typing using Promptheus

- Custom instructions are very useful for getting the most out of voice conversations, providing background information before ChatGPT starts generating content.

- Pro tip: Specify in the instructions how you want ChatGPT to respond, asking for shorter, more concise answers for a better conversation flow.

- Writing blog posts with ChatGPT is more efficient when using pre-made workflows or prompt stacks, especially for SEO articles.

- Pre-made workflows are sequences of pre-written prompts

Example SEO Prompts

- Using 'ketogenic diet ' as the central seed keyword, identify 15 long-tail keywords that potential customers might use when they look for convenient and beginner friendly options

- Which three of the 15 long-tail keywords do you think have the most commercial intent, and why?

- Give me 30 semantically relevant but unique topics under the main category of 'gym exercise.'

- Give me the result in a table with 5 columns.

- From the list of 30 seed keywords you provided, identify the top 5 you think are most important for immediate focus and explain why.

- Group the following 20 keywords into clusters based on topic relevance: *[insert keyword list]* Give the output in a table format.

- From each keyword cluster you've created, suggest one blog topic I could write about.
