## How big of a level kit should you get?

Leveling kits are really only designed to remove the rake (uneven front to back ride height) or clear room for slightly bigger tires for street use only. Stay to 2.25" or under. At 2.5" your upper control arm and front spring are likely to make contact... you will be able to get by if you're not going offroad with more and cycling your suspension a lot. But we recommend a [lift kit](#) if you want more than 2.25 inches.

Having trouble deciding how high to go? We breakdown [level vs lift kits](#) and [4" vs 6" lift kit](#) options.

**Got a Raptor?** Skip all the leveling kit options and move your shock height to [mid perch](#).

## Safety Note

Changing your ride height will alter your wheel alignment. If you stay to 2.25" or less of lift a short travel distance may be carefully taken but it is not recommended to drive long distances or on the freeway prior to having a professional wheel alignment.

---

## Product We Reviewed

Roush / Fox / Ford Performance

Fox made arguably one of the best 2" (adjustable) leveling kits for the 2004-2021 Ford F150 Period. It's sold by Roush and Fox directly. It provides no compromises in ride quality, towing capability or premature suspension component wear of any kind.

It comes with a front strut and spring already assembled and a rear shock upgrade.. Just remove the old parts and bold the new one. The front strut has an adjustable coil over from 0"-2" in height.

While not the cheapest option, this is for those buyers that do need a full on lift kit and are looking for a no compromise option to improve the appearance of their truck.

It's such a good kit, [Ford Performance](#) now sells it as an aftermarket option that is warranty safe.

## Quick Facts

**Level Type:** Spring & Strut | **Lift Size Options:** 0-2" | **Warranty:** 12 months  
12,000 miles

## Pros

- Top Brand Shock / Strut Combo
- Front and rear damping upgrade
- Loaded Strut/Spring
- Best in Class ride quality
- Easiest install with shock/strut swap

## Cons

- Premium Price Tag
- Limited Warranty

## MotoFab 2 inch Front Spacer

The MotoFab 2.0 inch level kit is proudly made in the USA so you can expect them to be made of high quality. These kits are CNC machined out of billet aluminum and powder-coated black after. This front leveling kit helps in presenting an exact match to the color of the factory suspension of your Ford F150 model.

This leveling kit is compatible with the Ford F150 2004-2021 2WD & 4WD model. It can raise the front portion of the F150 by a true 2". Installation can take from 1.5 hours to 2 hours but would not require coil/strut disassembly. This makes it highly advantageous over other kits. You can also utilize bigger tires with this option.

Expect these kits to be of high quality as they are more efficient compared to different welded spacers that eventually crack over time. To back the quality of these items, MotoFab offers a lifetime warranty that any Ford F150 vehicle owner would appreciate.

Just take note that due to suspension geometry, the lift and the spacer thickness is not 1:1.

## Quick Facts

**Level Type:** Spacer | **Lift Size Options:** 2-3" | **Warranty:** Lifetime

## Pros

- Lifetime Warranty
- Made in the USA
- Pre-install bolts on spacer
- Aluminum Powder Coated Black

## Cons

- Ride quality Trade off

Rough Country 2" Leveling Kit with N3 loaded Struts

This 2" leveling kit from Rough Country is the perfect option for any Ford F150 2009-2020. We chose this as one of the best option on the list because of multiple factors.

First is the brand, Rough Country has been providing high-quality products for years and multiple customer reviews have proven that the company has an impressive reputation.

The spring, strut, shot combo leveling kit from Rough Country helps maintain a smooth OEM-like rike. You can expect impressive ground clearance that can perform well on both highway and off-road terrain. The ride quality does not decrease as it maintains the factory ride quality.

We also picked this at number two because of the bolt-on installation. While longer than a typical spacer. We understand the importance of the quick-installation so that we won't waste time.

With this one, you don't have to disassemble the factory strut of your F150 and that's a huge plus for 4wd 2wd truck owners that are always in the rush.

They do offer a limited lifetime warranty, meaning its lifetime warranty against a manufacturing defect. If they just wear out from typical use that wont be covered.

#### Quick Facts

**Level Type:** Loaded struts, shocks & rear blocks| **Lift Size Options:** 2-3" |  
**Warranty:** Lifetime hardware - 3 year shocks / struts

#### Pros

- Front and rear damping upgrade
- Loaded Strut/Spring
- Ride quality improvement over spacer
- Great Price & Value

#### Cons

- Premium Price Tag
- Best Warranty with shocks

## Bilstein 5100 Series Shock Kit for Ford F150

The Bilstein 5100 leveling kit fits the Ford F150 4WD 2009-13. It offers adjustable front shocks up to a 2" lift and a 1" lift for the rear. This was the gold standard kit prior to the fox option and is a Strong 2nd place for ride quality.

This leveling kit takes a bit more to install in the front due to needing to remove the front springs from the factory struts. But There are no modifications needed to your truck for installation.

Expect premier ride quality with this option as it offers great performance as well as style.

Again, same with our top 2 picks, this product is offered with a warranty for a lifetime. We told you our best picks provide the best deals for truck owners.

Quick Facts

**Level Type:** Shocks & Strut Combo | **Lift Size Options:** 0-2" | **Warranty:** Limited Lifetime

Pros

- Front and rear damping upgrade
- Premium ride quality
- Great Price & Value
- Great Warranty

Cons

- Spring Compressor required for installation
- Limited to 2009-2013 f150s

## Ready Lift 2.25" Leveling spacer

Hands down the highest quality spacer. A trusted brand with a 1 piece CNC machined billet aluminum spacer. Pre installed nuts and the maximum lift from a level kit can get (2.25") without damaging any factory component..

#### Quick Facts

**Level Type:** Spacer | **Lift Size:** 2.25" | **Warranty:** Lifetime

#### Pros

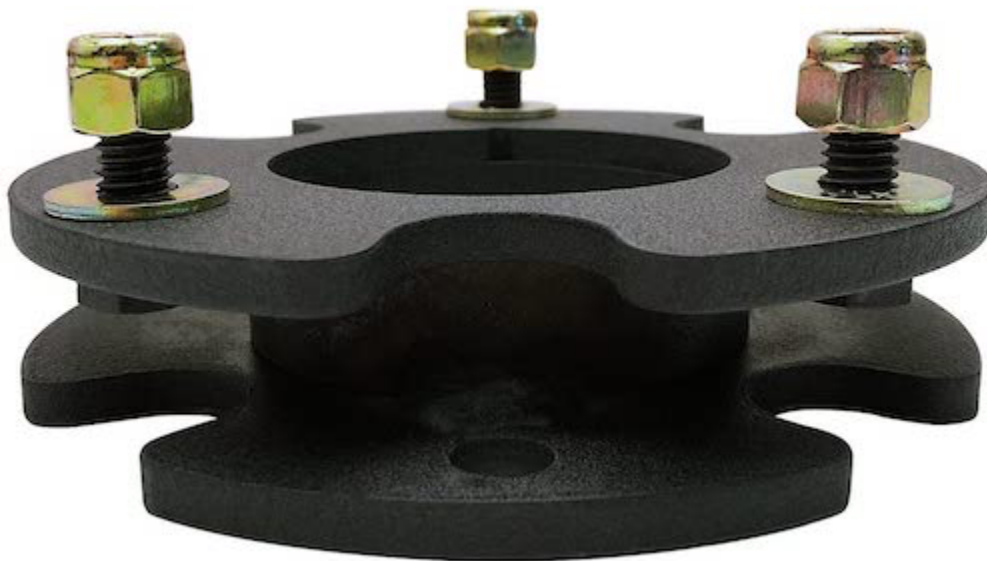

- Largest safe spacer lift
- Highest quality materials

#### Cons

- High cost for just a spacer
- Ride quality tradeoff

## Tuff Country F150 Leveling Kit

Tuff Country sounds the same as Rough Country. Yes, it does sound like that, but you better not confuse the name with Rough Country. I guess you haven't heard of this company, well; neither have I.

When I was doing my part of research for this article, I found this product with a rating of a solid five stars. What I think is that many sellers have not yet discovered this company.

I have not heard about Tuff Country but guess what, I got it. As the world has not yet discovered this company, it does not mean it won't deliver certified products. Let us see what this product has to offer –

This product can be easily mounted to the models of Ford F150 2WD or 4WD truck released from 2009 to 2017. Additionally, this product can serve with a lift of 2" at the front end. If this gets installed to F150 models it can solve the nosediving issues that you probably face.

Like every other great suspension system, this kit equalizes the levels of front and rear. As both the front end and rear end are now at an equal height, your Ford truck will gain greater and enhanced stability.

The Tuff Country manufacturers assure you that if you mount these to your Ford F150 truck, this kit can restore the original stock performance. The only difference you will see is the height. You can expect the same factory ride quality.

When all the talking is about kits, every manufacturer focuses on restoring the OE quality performance. But unfortunately, many products fail in increasing the shock absorptions.

Tuff Country also gives you a warranty for life on their products. However, if you sell your ride to another person, this will void your warranty. And if you do not, you are going to love this lifetime warranty.

Quick Facts

**Level Type:** Spacer | **Lift Size:** 2" | **Warranty:** Lifetime

## Pros

- Easy & quick install
- Limited-lifetime warranty

## Cons

- Low quality construction
- Ride quality tradeoff

[Buy On Amazon](#)

## Conclusion

This is pretty much it. Here is the list of the best five options to make your ride better. Choosing the right part for your vehicle is very crucial and is a daunting task for sure.

But now that you read this article to the last sentence, I hope this article proves its worth to you. And all the products I listed here are based on your requirements and the ideas of the other 4WD or 2WD truck owners. Another tip, make sure you check out what each kit includes on the set.

What's the delay about? Get your leveling kit now!

## Our Top Pick: Recommended Product

After thorough research on the kits, I have selected the [Motofab Lifts F15 2.5 inch Levelling Kit](#) as my top pick as the best f 150 leveling kit. The other products are excellent, but this product right here contributes a lot to your trucks' driveability, transmission, and dynamics.

It provides a proper and balanced lift and enhances the stability of your vehicle. Hope this helps with your search for the best ones for 4WD 2WD F-150 trucks.
