Introduction

The contents of the article are typed using the Candara 11 pt font with a margin of 2 cm on the top, 2 cm on the left, 2 cm on the bottom, and 2 cm on the right on A4 paper. Reference citation using APA (American Psychological Association) format The paragraph spacing uses 1 space. This section contains: (1) the importance of the research conducted; (2) an explanation of the object and scope of the study; (3) presenting the latest literature related to the topic under study; (4) analyze the strengths & weaknesses of previous publications; (5) convey the principles of research results or current conditions, and (6) convey the objectives and novelty of the research; This section contains clear gaps in the problems studied.

Method

This section contains the design or design of the research carried out. In this section, at least it contains the type of research, research subject/object, data collection techniques/instruments, and data analysis.

Results and Discussion

This section contains the results of data analysis, test instruments and hypotheses (if any), answers to research questions, findings, and interpretation of findings. Research findings as far as possible are discussed by linking the results of previous research. Also in this section, the author presents the advantages of his research findings and the possibility to be able to contribute to the development of the scientific field. If there is a table that is presented, it must comply with the following format:

Table 1.
Evaluation Component

Component	Evaluator		Score
	Student	Teacher	
1. Teacher performance in class	X	X	30
2. Biology learning facilities	X	X	45
3. Class climate	X		36
4. Student attitude	X		33
5. Student learning motivation	X		45

Evaluation Component

Conclusion

This section contains conclusions from the results of the study and the limitations of the results of the research conducted. In addition, this section also emphasizes the possibility for further research to cover the limitations of the findings.

Reference

Contains sources referenced in writing articles in the last ten years. The references used are expected to be 80 percent from primary sources originating from reputable national and international journal articles. The bibliography is written in the following formatAPA (American Psychological Association). Bibliography is written really only contained in the article and arranged alphabetically. Using the Mendeley, Endnote, or Zotero apps is recommended.
