

# Field Notebook

**TASK:** Create a scientist's notebook to record your thinking during the ISI experience.

**PURPOSE:** As a scientist of teaching and learning, you will incorporate a practice used by scientists from da Vinci to Einstein to record ideas, insights, questions, and reflections-- a scientist's notebook. The ISI Field Notebook is a reflective place, a record of your ISI daily experience, a space for you to record your ideas, questions, resources, responses, and reflections.

**CRITERIA:** Include Opening/Closing Moments and Reading Responses in your Field Notebook and additional sections of your choice that help you record and reflect on your daily ISI experience (ideas/strategies to try in your classroom, resources, artifacts, questions, for example). The organization of your notebook is up to you.

**AUDIENCE:** You and your coach
