Abstract

This template is a guide format for authors. Authors should follow the directions given in this guide. This document can be used as a reference in writing articles. Make sure to keep the style in this template the same, including the font type and size, spacing, indent spacing, and so on. The number of pages for the JIEBMA is a minimum of 7 pages and a maximum of 20 pages. If foreign terms still need to be standardized, they are written in italics. Write an abstract of up to 200 words. The abstract contains an introduction, the purpose of community service, materials and methods, results of community service, and conclusions made in 1 (one) paragraph. Abstracts are written in English or Indonesian. (CAMBRIA, size 9, Italic).

INTRODUCTION

Contains the urgency of research and phenomena. The contents of the paragraph must be able to answer the question "why this research should and immediately be done ". contains the reasons for selecting the object. The contents of the paragraph must be able to answer the question "why choose the object of the research" and "what is the difference between the object and other similar objects". Contains about variables and their interrelationships. the writer needs to briefly describe the relationship and interrelationships between variables. contains research gaps. Gaps in this study must include previous research, with at least one of the previous studies having the most recent year. (CAMBRIA, size 11).

Image (Charts, photos, and Histogram) in the article must be accompanied by the source image, image sequence number, and the name/title of the image. Draw order number and the name/title of the picture is written at the bottom after image. Text on the contents of the image is written with a font size of 11. Bold letters only in figure text and figure numbers, figure titles are not written in bold. For Example:

Figure 1. JIEBMA Logo
Source: Journal (2025)

The name/title of the table is written Regular at the above, align left, before table. **Bold** letters only in **table text** and **table numbers**, table titles are not written in bold. For Example:

Table 1. Report (Cambria, size 11)

Country	Zakat Distribution	Digital Services
Indonesia	Good	Available
Saudi Arabia	Very Good	Available

Source: Zakat Global Report, 2024

The hypothesis (if any) is directly related to a theory but contains operationally defined variables and is in testable form. It is a specific, testable prediction about what author expect to happen in a study. researchers might draw a hypothesis from a specific theory or build on previous research of the past five years. (CAMBRIA, size 11)

H1: Inflation has positive effects on Poverty
H2: Letterless has positive effects on Poverty

METHOD

This chapter contains the methods used in this study, composition of the method must contain the type of research, research instrument (optional), data source, including location, time, etc., population and sampling technique with appropriate sample size, analysis technique, variable operational definitions (can be presented with a table or a combination by separating the definitions in paragraphs), and all must be complete and clear. (CAMBRIA, size 11).

RESULTS

The opening sub-chapter of the results chapter can present the characteristics of the respondents. (CAMBRIA, size 11). This second sub-chapter can be started from the results of the

analysis carried out, if there are tables, charts, or images that are prohibited from print screen, and must be given information on how to read and understand them.

The name/title of the table is written Regular at the above, align left, before table. **Bold** letters only in **table text** and **table numbers**, table titles are not written in bold. For Example:

Table 2. Validity Test (Cambria, size 11)

Variable	Indicator	Pearson Correlation	R-Table	Conclusion
Inflation	INF1	.688	.1789	Valid
	INF2	.673		
	INF3	.666		
	INF4	.675		
	INF5	.685		
Letterless	LTL1	.535	. 1789	Valid
	LTL 2	.660		
	LTL 3	.656		
	LTL 4	.514		
	LTL 5	.739		
	LTL 6	.748		

Table 3. Research Hypothesis Test (Cambria, size 11)

Hypothesis		Path Coefficients	t-value	Results
Inflation → Poverty	H1	.398	6.818	Support
Letterless → Poverty	H2	-.26	-.36	Support

DISCUSSION

Contains a description of the discussion of community service results and theoretical discussions relevant to the findings of community service results. It also discusses the theoretical findings of the service process from the beginning until social change occurs. The discussion on the results of community service is strengthened by references and theoretical perspectives supported by relevant literature reviews. (CAMBRIA, size 11).

Paragraphs begin with words indented into six digits and may use organizing writing into "sub-heading children" for each variable. References use writing rules APA (American Psychological Association) Style sixth edition. (CAMBRIA, size 11).

CONCLUSION

It contains a summary description of the research results in the form of theoretical reflections and recommendations (if any). (CAMBRIA, size 11).

ACKNOWLEDGEMENTS

(If Any) It contains a description of gratitude or acknowledgement to parties (individuals or institutions) who have helped directly or indirectly on this research. (CAMBRIA, size 11).

REFERENCES

The bibliography is written according to the APA (American Psychological Association) style's writing rules. All references used in writing in the bibliography use the format Example → (Wibowo, 2025) in the article, writing using CAMBRIA 11 points (upright). Arranged alphabetically. Only include the literature used and relevant. Reference sources of at least 80% of the latest literature (last ten years). Reference sources in the form of journals from articles of at least 60% of the total bibliography. The references used are primary sources in the form of articles in journals or reports, related books or articles from official sources. To maintain consistency in referring, quoting and writing a bibliography, we recommend using standard reference applications such as Endnote or Mendeley.

Example of a Reference List (APA Style):

Braun, V., & Clarke, V. (2006). Using thematic analysis in psychology. *Qualitative Research in Psychology*, *3*(2), 77–101. https://doi.org/10.1191/1478088706qp063oa
