#### **My future profession**

Choosing a career and getting a job are two things, any person passes through in his life.

When millions of young people leave school, they begin an independent life. Some of them start working, go into business; some of them keep upgrading their schooling to receive higher education.

Young people can learn about professions in magazines and advertisements. Magazines for teenagers often offer questionnaires, quizzes to help young people to find out their interests and abilities more clearly and to make a decision concerning their future occupation.

While choosing a career one should take into consideration all main possibilities that his future profession might provide: the profession must be interesting, one has to be sure of his future (that means that one will be able to find a job after his graduation from the university or institute), a profession must be well-paid, otherwise you won't be able to support yourself and your future family.

During our school life, we begin to think about our future life, our job. There are many professions in the world, so it is quite difficult to choose and make a decision. Some follow their own choice; some follow parents' advice, because they can help concerning future plans.

It is a great advantage of choosing our future career being a school pupil. It gives us a goal and enables us to choose a right, suitable course of study. It gives us time to be prepared. Also, I'd like to mention that if we don't think about our future, nobody will think, so we just can have one way. We must work hard to realize our wishes, because future is purchased by the present.

If you want something be done well, do it yourself, make a right decision.
