

So, after about three weeks, I finally have the results all organized for the [shipping survey](#) I made a month ago. It took me a minute to get it ready, because I wanted all the data in nice graphs and pie charts, and since everyone has different typing styles, I had to copy all the information down in the same style so Google Sheets could process it. But I finally have it!

I will give a general analysis here, so you can see the most important information easily, but if you want to read through the responses yourself, I will link the Google Sheet down below. That said, let's begin!

## THE TOP TEN SHIPS OVERALL

When calculating for the top ten ships, I didn't combine the number of ships for the same pairing from two different categories, like Marth/Caeda, who has 108 in FE1/11, and 42 in FE3/12, as sometimes the same people put down the same ship twice, and as such would be inflating the value of that ship. But I was also too lazy to subtract a ship for every person that made a duplicate, so if a character had the same ship across multiple games, I just took from the game where that ship had the highest number, and used that. I used Marth/Caeda's 108 from FE1/11, for example.

In 1st place, with 108 total ships, Marth/Caeda!

In 2nd place, with 70 total ships, Ike/Soren!

In 3rd place, with 66 total ships, Leif/Nanna!

In 4th place, with 64 total ships, Roy/Lilina!

In 5th place, with 59 total ships, Eliwood/Ninian!

Tying in 6th, with 49 total ships each, Alm/Celica and Boey/Mae!

In 7th place, with 41 total ships, Chrom/Robin!

Tying in 8th, with 35 total ships each, Sigurd/Deirdre and Shez/Byleth!

In 9th place, with 34 total ships, Lyn/Florina!

In 10th place, with 33 total ships, Diamant/Ivy!

Honestly, I am kinda surprised at the results. I didn't expect Leif/Nanna to do as well as it did, or for there to be a huge lack of Corrin/Camilla and Byleth ships. I expect the reason Marth/Caeda, Alm/Celica, Sigurd/Deirdre, Leif/Nanna, and Roy/Lilina did so well was because people hadn't played their games, and were just answering the basic canon ship. Anyway, with all that information out of the way, here is some fun stuff!

The Top 5 most shipped games are:

1st - Fire Emblem: Three Houses

2nd - Fire Emblem: Awakening

3rd - Fire Emblem: Fates

4th - Fire Emblem: The Blazing Blade

5th - Fire Emblem: Engage

I also read through peoples dislikes in ships, and I noted the ones that came up the most. I also noticed that the reason people dislike these ships are A) Bad Character = Bad Ship, B), They didn't like the ship due to it being bad in their opinion, or C), They had a headcanon sexuality for a character, and the ship didn't agree with it, for example, people like Chrom gay, and as such, there were a lot of Chrom/Sumia's among the disliked ships. Here are the ones that came up the most:

- Chrom/(Male) Robin
- Byleth/Edelgard
- Makalov/Astrid
- Soleil/Ophelia
- Corrin/Family
- Ike/Elinia
- Robin/Lucina
- Ike/Soren
- Robin/Tharja
- Felix/Annette
- Alm/Celica
- Chrom/Sumia
- Dimitri/Edelgard
- Avatar/Child Character
- Alear/Ivy
- Byleth/Student
- Eirika/Ephraim
- Sothe/Micaiah
- Cyril/Lysithea
- Anyone/Nowi
- Spider-Man/Lucina (Don't ask, don't look it up.)

And finally, here are some funny crackships I noticed. Also, if you don't know what a crackship is, it is essentially a nonsense ship that you don't take seriously, but is funny and absurd regardless.

Lucina x Spider-Man (Like 4 separate people put this down.)

Edelgard x Goku

"Drugs are bad"

Arvis x Edelgard

Gatree x Tree in a Skirt

"Your mom and her crack dealer"

Chrom x Ephraim

Garon x Anankos

Lucina x Peppa Pig

Chrom x Grima

Goku x Olivia

Valter x Eirika

And now, finally, I am done. This was really fun, but I would absolutely not do it again. But it was a joy reading the funny comments people put in there, and it was nice seeing some of you guys

be so wholesome and wishing me a good day. Thank you so much! Also, like 20% of you guys needs to touch grass. Immediately. Thank you so much, and if you want all the information, [here is the complete spreadsheet](#), with all the responses, pi charts, and organized information. Thank you all for participating!
