

Train ChatGPT to Sound Like You

***£7 mini-training that turns ChatGPT into your personal content assistant,
without making you sound like a robot 🤖***

Most people use ChatGPT like Google.

Smart investors are using it like a *clone of their brain*.

This training shows you how to make ChatGPT sound like you, so it can write your emails, your posts, your investor decks, and more, *without losing your voice*.

It's the exact system I've used to:

- Write content 5x faster
 - Stay consistent across platforms (email, social, website)
 - Build trust faster with my audience (because everything still *sounds* like me)
-

Here's what you'll learn:

- ✅ How to capture your tone of voice and how you speak naturally
- ✅ How to teach ChatGPT your tone, vocabulary, and style
- ✅ How to create a brand voice & business overview template that makes ChatGPT output 10x better
- ✅ Example prompts for social posts, bios, investor content, and emails

This isn't a course.

It's a **step-by-step system** you'll actually use, and see results within 30 minutes.

Perfect if you:

- Feel like ChatGPT's tone never quite sounds like you
- Waste time rewriting robotic drafts
- Want to post more consistently but always overthink it
- Need help creating investor-facing content that sounds human

You get instant access for £7.

No fluff. No monthly subscription.

Just a clear, powerful process that turns ChatGPT into the most useful member of your content team.
