

How to verify the network architecture (gre or vlan)

Jing, mqjing@gmail.com

neutron net-show int_net

```
ubuntu@ubuntu-vmware-controller:~$ neutron net-show int_net
```

Field	Value
admin_state_up	True
id	ab050eb1-3db9-4220-b91d-1ce10352630f
name	int_net
provider:network_type	gre
provider:physical_network	
provider:segmentation_id	1
router:external	False
shared	False
status	ACTIVE
subnets	ccc4b670-ab76-440d-be75-feeb1acbf011
tenant_id	c30dba12e5014299bf506d61503267bd

grep -nr "tenant_network_type" /etc/neutron/plugins/openvswitch/ovs_neutron_plugin.ini
