

COID Documentation

Module: **Users**

Type	Item	COID to review
	What are users? • Users are end-users of the COID application. A user may be part of multiple user groups (i.e. field staff and financial editor). • User privileges are separated into administrators, staff, and patrons. Admin and staff are added manually by system and district administrators. Patrons are self-added via the Patron Onboarding Process.	
	Login should auto-login to a selected user account.	
	Deleting a user should be a soft delete unless there are no records attached to the user_id.	
	The users section of the application is only accessible by System Administrators and Districts Administrators.
