MARRIAGE & FAMILY vs. GOVERNMENT & PLANNED PARENTHOOD:

(see also: Thomas Sowell, Walter Williams, Heritage Foundation)

While the black "poverty rate" (27%) is nearly triple that of whites (10%), the rates drop greatly for married families (8% for blacks and 5% for whites).

So-called "poverty rates" among black married couples has been [in single digits since 1994](#). (There is no true physical "poverty" in America at this point.)

Black unemployment is double that of whites; it was not so before minimum wage.

The black out-of-wedlock birth rate (72%) more than doubles that of whites (29%). In 1940, black out-of-wedlock births were 14%, whites 2%. In 1965, blacks were at 25%, whites 6%. In 1990, blacks were at 64% and whites 18%.

The black abortion rate (32% of pregnancies) more than doubles that of whites (14% of pregnancies), not counting the “morning-after” abortion pill.

CRIME RATES: BLACK-ON-BLACK, BLACK-ON-WHITE, BLACK-ON-COP:

(see also: Heather Mac Donald, Colin Flaherty, Jared Taylor, John R. Lott)

The black felony rate (1,178 per 100,000) more than triples that of whites (330 per 100,000 in 2004).

Black-on-black murder victimization (4.9 per 100,000) nearly quadruples the white-on-white murder rate (1.3 per 100,000 in 2014).

Blacks commit murder (12.5 murders per 100,000 blacks) at more than five times the rate whites do (2.2 murders per 100,000 whites in 2013).

BLACKS vs. POLICE:

Blacks kill police at more than five times the rate that nonblacks do. Cops risk being murdered by blacks at six times the rate that blacks (usually violent criminals) risk being killed by police. Most killings by police are justifiable. Most cop-killings are not justifiable.

The black-on-white murder rate (about 10 murders per million blacks) is about eleven times the white-on-black murder rate (less than 1 murder per million whites).

RAPE & SEXUAL ASSAULT:

Blacks committed rape or sexual assault (129 offenses per 100,000 blacks) at nearly three times the rate that whites did (45 offenses per 100,000 whites).

Blacks raped or sexually assaulted whites more than 19,000 times in 2008, while the estimated number of white-on-black sexual assaults in the country was negligible.

(2) VIOLENT CRIME (robbery, assault, rape & sexual assault):

DOJ's Bureau of Justice Statistics [Criminal Victimization Survey in the U.S., 2008](#) (Table 42, page 55): "Percent distribution of single-offender victimizations by type of crime, race of victim, and perceived race of offender"

NOTE: The white population (197 million white non-Hispanics, 63% of US population, or 220 M whites including white Hispanics) approaches 5 times the size of the black population (39 million blacks, or 42 million blacks including mixed-race blacks, 13% of US population)

Completed violence: in 2008:

white-on-black: 30,557

black-on-white: 137,068

white-on-white: 479,034 (victim rate 243 per 100,000)

black-on-black: 140,142 (victim rate 333 per 100,000)

Blacks committed 4.5 times as many crimes of violence against whites as whites committed against blacks.

Therefore blacks were 21 times as likely per capita to attack whites as whites were to attack blacks. Blacks committed 37% more violent crime against one another, per capita, than whites.

Robbery, 2008:

white-on-black: 6,988

black-on-white: 70,605

white-on-white: 90,835 (46 per 100k)

black-on-black: 58,205 (138 per 100k)

Blacks committed more than 10 times as many robberies against whites as whites committed against blacks.

Therefore blacks were more than 47 times as likely per capita to rob whites as whites were to rob blacks. Blacks robbed one another three times as often per capita as whites robbed other whites.

Aggravated assault, 2008:

white-on-black: 15,124

black-on-white: 76,809

white-on-white: 270,144 (victim rate 137 per 100,000)

black-on-black: 65,737 (victim rate 157 per 100,000)

Blacks committed 5 times as many aggravated assaults on whites as whites did against blacks. Therefore blacks were 24 times as likely to commit aggravated assault on whites as whites were on blacks. Blacks committed aggravated assault against one another 15% more per capita than whites.

Rape or sexual assault, 2008:

white-on-black: 0

black-on-white: 19,293

white-on-white: 88,112 (of over 200 million whites; victim rate 44 per 100,000)

black-on-black: 34,842 (of under 40 million blacks; victim rate 87 per 100,000)

White-on-black rape & sexual assault the DOJ could not estimate above zero in 2008. However, blacks raped or sexually assaulted whites approaching 20,000 times in 2008. Blacks raped or sexually assaulted one another at nearly twice the rate that whites raped or sexually assaulted one another.

NOTE: The Bureau of Justice Statistics stopped publishing its table on interracial crime after 2008, perhaps not coincidentally, the first year of the Obama presidency. The agency explains its decision on the ground that some of the estimates in particular crime categories, such as sexual assault, are based on sample sizes that are too small to be statistically reliable. But that is no reason not to tabulate data on the crimes for which reliable estimates are available. (3) Murder, 2011 ([known cases, FBI](#))*

white-on-black: **193** (white offender rate 0.1 in 100,000)

black-on-white: **448** (black offender rate 1.1 in 100,000)

There were 2.3 times as many whites murdered by blacks as there were blacks murdered by whites. That means blacks were nearly 11 times as likely to murder whites as whites were to murder blacks.

Murder, 2013 ([known cases, FBI](#))*

white-on-black: **189** (white offender rate 0.1 in 100,000)

black-on-white: **409** (black offender rate 1.0 in 100,000)

CALIFORNIA HOMICIDE HISTORY:

In 1953, California had 276 homicides. 26 years later, in 1979, nearly 3,000 homicides, six times the rate per-capita. Incidentally,

the Crips founders were **born** in 1953, and started the Crips in 1969, the same year of the Charles Manson killings.

Anti-Trump Hate Map (June 2017) <https://www.amren.com/archives/reports/anti-trump-hate-map/>

“HATE CRIMES” (Ann Coulter analysis)

[Ann Coulter](#) analyzed a recent “Hate Crimes” report as well as interracial crime numbers from 2008, last year they counted it:

According to a... report on "hate crimes" produced by Eric Holder's Justice Department, blacks are far more likely to be victims of hate crimes than whites are....

Holder's DOJ got to the desired outcome by:

(1) Defining "hate crime" only as those in which the perp uses a racial epithet....

(2) Defining Hispanic perpetrators as "white."

(... Hispanics are [counted as] "Hispanic" when they are victims of crimes, but "white" when they are the perpetrators.)

(3) Defining less than 0.1 percent of all violent crimes as "hate crimes."

(According to the FBI's detailed crime victimization report, there were about 1.2 million violent crimes in 2012, but Holder's Justice Department characterized less than 1,000 of those as "hate crimes.")

The FBI's crime victimization surveys tell a very different story, one more in line with a normal person's life experience.

In 2008, the most recent year for which such data seems to have been collected, FBI surveys show that, out of 520,161 interracial violent crimes, blacks committed 429,444 of them against whites, while whites committed 90,717 of them against blacks.

In other words, **blacks commit more than 80 percent of all interracial violent crime.**

(5) **VIOLENT CRIME OF BLACK YOUTH:**

A 2012 study by the Department of Justice's [Office of Juvenile Justice and Delinquency Prevention](#) revealed that in 2010 black youths committed six times more murders, three times more rapes, 10 times more robberies and three times more assaults than did their white counterparts [per capita].

The Federal Bureau of Investigation (FBI) released similar statistics in the "[Uniform Crime Reports](#)." They determined, "In the year 2008, black youths, who make up 16% of the youth population, accounted for 52% of juvenile violent crime arrests, including 58% for homicide and 67% for robbery." By contrast, the only categories where white youths surpassed blacks were in liquor law violations and driving under the influence.

[Juvenile Arrest Rates by Offense, Sex, and Race \(1980-2012\)](#)

from National Center for Juvenile Justice (December 16, 2014)

2012 stats on youth, ages 10-17:

Murder & non-negligent manslaughter arrests:

whites 1.3 per 100,000

blacks 6.9 per 100,000

Black youth were nearly 6 times as likely as whites to be arrested for murder.

Forcible rape arrests:

whites 6.4 per 100,000 (incl. "white Hispanics")

blacks 15.4 per 100,000

Black youth were more than twice as likely as whites to be arrested for forcible rape.

Robbery arrests:

whites 24.6 per 100,000

blacks 270.1 per 100,000

Black youth were more than 11 times as likely as whites to be arrested for robbery.

Aggravated assault arrests:

whites: 78.8 per 100,000 (includes "white Hispanics")

blacks: 282.8 per 100,000

Black youth were over 3.5 times as likely as whites to be arrested for assault.

American Indians: 67.8 per 100,000

Asians: 26.6 per 100,000

Law Enforcement Officers Feloniously Killed:

Race and Sex of Known Offender, 2004-2013

FBI: UCR (Table 44)

Number of known offenders: 565

White: 289

Black: 243

Asian: 9

Indian: 7

Not reported: 17

Blacks* were 43% of cop killers 2004-2013,

Whites**, including "white Hispanics," were 51%.

*Blacks were 13%-14% of the population,

**Whites including white Hispanics were over 70% of the pop.

Black cop killers overrepresented 3+ times their share of pop.

NOTE: The white population (197 million, 63% of American population)
approaches 5 times the size of the black population (42 million,
13% of American population). Whites & white Hispanics - 246 million (77%)

According to these stats, counting:

289 "white" cop killers out of 246M whites & white Hispanics, versus

243 "black" cop killers out of 45M blacks & mixed-race blacks,

...blacks were 5 times as likely to kill cops as "whites."

According to John Lott, Obama said blacks are arrested at twice the rate of whites, but he failed to note blacks commit murder at almost 6 times the rate whites do.

Obama said "African American" and Hispanic population make up only 30 percent of the general population, but make up more than half the incarcerated population. But his own FBI claims that gangs commit 80 percent of crimes in the U.S., and the National Gang Center estimates that 82 percent of gang members are black or Hispanic.

Obama claimed: "[Blacks] receive sentences that are almost 10 percent longer than comparable whites arrested for the same crime." Putting aside questions as to how comparable the crimes are or the criminals' past histories, Obama again leaves out crucial details. Whites are more likely to face other penalties than blacks — fines and restitution, loss of professional licenses, and a greater drop in legitimate earnings upon returning to the labor force after prison. (Is *that* racism?)

SOURCE: John R. Lott, Jr., Obama's false racism claims are putting cops' lives in danger ([NY Post](#)), 2016. (Obama should stop smearing cops by calling them racist.)

According to Heather Mac Donald, 12 percent of white and Hispanic homicide deaths were due to police officers, while only four percent of black homicide deaths were the result of police officers.

The Washington Post claims that "unarmed" black men in 2015 were 6-7 times as likely as whites to die at the hands of police, but they don't admit that of these "unarmed" black men, at least five in 2015 tried to grab the officer's gun or had been beating the cop with his own equipment. Some were shot accidentally as a result of their assault on an officer. And two included by the Post were struck by stray bullets in justified police shootings. One "unarmed" black man in San Diego "jumped" an officer, who shot the him for fear of his life. Once in 2015, three officers were killed with their own weapons, which suspects had wrestled from them.

Black and Hispanic officers are quicker and more likely to fire a gun at blacks than white officers, according to the DOJ COPS program in Philadelphia Police Dept, PA, 2015. University of Pennsylvania criminologist Greg Ridgeway in 2015 determined black cops were 3.3 times as likely to fire a gun than other cops at a crime scene.

Blacks are 13% of the population, 30% of those killed by police, and 47%* of those who kill police. Police killings of blacks are down 70% in last 50 years.

*[Daily Wire](#) says FBI data found 40% of cop killers are black. Heather Mac Donald says the police officer is 18.5 times as likely to be killed by a black than an unarmed black is to be killed by a cop.

It's true blacks are 3-4 times as likely as whites to be killed by police, but they are 5-6 times as likely to *kill* police.

NOTE: Blacks are also 3 times as likely as whites to be felons, 6 times as likely to commit murder, nearly 3 times as likely to commit rape, 7-10 times as likely to commit robbery, and 2-3 times as likely to commit aggravated assault.

47% of cop killers are black. (FBI Universal Crime Statistics)

Blacks are 5.6 times as likely as non-blacks to kill a police officer. (WSJ, 2015)

Police are 6 times as likely to be killed by blacks as blacks are to be killed by police. (WSJ, 2015)

"Police officers have more to fear from the public than the public has to fear from police."

Average annual risk:

- Police risk of being killed in America: 8.1 per 100k (average 52 cops killed per year out of 630k cops*)
- Police risk of being killed by a black: 3.8 per 100k (average 24 police killed. Black pop. 43 million)
- Police risk of being killed by a nonblack: 4.3 per 100k (average 27 cops killed. Non-black pop. 270 million)
- Black risk of being killed by police: 0.6 per 100k (estimated 270 blacks killed in a year)
- White risk of being killed by police: 0.2 per 100k (estimated 500 whites killed in a year)
- 47% of cop killers are black, only 14% of the population.

- Blacks are 5.6 times as likely to kill police as non-blacks. (Black cop-killer offender rate 0.056 per 100k vs. non-black cop killer rate 0.010 per 100k)
- A police officer has 6 times the risk of being killed by a black as vice versa. (Police risk 3.8 per 100k vs. black risk 0.6 per 100k)

H/T "What Statistics Say About Policing America" (Kent Osband, [WSJ](#), Jan 2015)

* (The above is based on 630k police, according to Kent Osband at The Wall Street Journal in 2015. Gov. Jeb Bush said it's 800k in December (2016?). The Skeptical Libertarian blogger says 900k in 2014. Wikipedia says 1.2 million.... Taking Wikipedia's numbers cops would still be more than three times as likely to be killed by a black as vice versa.)

CONFUSING INFO and CLARIFICATION: Someone said blacks are 80% more likely than whites to be killed by police (not sure how this is qualified, since the black rate of getting themselves killed by police per total population is 3-4 times that of whites). In 2012, incomplete info from the federal government said that police shot & killed 123 blacks & 326 whites (low estimates, and the whites should be 227, because the 326 includes 97 "white Hispanics," and the blacks include 2 black Hispanics, according to [Politifact](#)).

What Statistics Say About Policing America: Police officers have more to fear from the public than the public has to fear from police. (Kent Osband, [WSJ](#), Jan 2015)

BLACKS KILLED BY POLICE: Estimated at 270 per year (of 43 million blacks in US):

FBI Uniform Crime Statistics report police killed a documented 4,000 people over the last decade, about 400 per year, 1/3 being black. WSJ estimates the actual number killed is 50% higher, so 600 per year, 200 blacks. Informal monitoring groups suggest police kill 1,000 per year, and if 1/3 are black that's 333. A generous estimate would be 800 killings by police per year, 270 being black.

POLICE KILLED BY BLACKS: Estimated at 24 per year (of 630,000 officers nationwide):

FBI Uniform Crime Statistics says that an average of 51 officers are killed per year, 24 per year killed by blacks (47%). Annually, we estimate 270 blacks are killed while 24 cops killed by blacks. That means 11 black civilians are killed by on-duty police (some black) for every officer killed by black civilians. There are about 68 blacks per officer.

POLICE RISK VS. BLACK RISK: 6 times greater risk of police being killed by blacks

Black risk of being killed by police: 0.64 per 100,000*

Police risk of being killed by a black: 3.81 per 100,000

BACK TO BLACKS KILLED BY POLICE VS POLICE KILLED BY BLACKS (WSJ article)

(1 police killed by blacks for 11 blacks killed by police) / (1 officer for every 68 blacks)

A cop is 6 times as likely to be killed by a black as a black is to be killed by a cop.

The Guardian projects 1100 people will be killed by police in 2015. They say that 29% killed are black. Let's overestimate and say 1/3 = 367 blacks killed by cops. 367 blacks, 24 cops. Let's say that makes 15 blacks killed for every officer killed. At 42 million blacks for 630,000 cops, an officer would STILL be at 4.4 times the risk of being killed by a black as a black has of being killed by an officer. ([TheGuardian, July 2015](#))

ALSO: A Study from Washington State University-Spokane: Officers were less likely to erroneously shoot unarmed black suspects than they were unarmed whites—25 times less likely. Officers also hesitated significantly longer before shooting armed suspects who were black, compared to armed subjects who were white or Hispanic.

—
WHITES KILLED BY POLICE: [MintPressNews](#) claims police kill 5 per million blacks (which is 0.50 per 100,000), 2 per million for both whites and Hispanics (this is an unclear statement: Perhaps they mean whites and white-Hispanics combined equal 2 per million.) Whites including “white-Hispanics” are killed at a rate of 0.20 per 100,000 whites & white Hispanics.

The federal govt counted an incomplete total of 121 black non-hispanics (and 227 white non-Hispanics) were killed by police in a year. Wall Street Journal estimates that 270 blacks are killed by police in a year. That is a factor of 2.23 times. If I assume that factor holds, then a very rough estimate of 507 whites are killed by police per year.

If, based on incomplete federal numbers to the numbers estimated by WSJ, I assume that the proportions of blacks vs. white non-Hispanics killed by police holds from the incomplete federal numbers to the actual numbers, then there are 2.23 times as many killings by police of blacks as the federal numbers say, and I would assume 2.23×227 whites = 507 whites killed by police per year. I have not found a way to know if that is an accurate estimate. But if 507 whites per 197 million population are killed by police per year, then the rate of whites killed by police is 0.26 per 100,000.

Black risk of being killed by police: 0.5 to 0.64 per 100,000 blacks
White risk of being killed by police: 0.2 to 0.26 per 100,000 whites
Police risk of being killed by a black: 3.81 per 100,000 police (risk from pop. of 45 million)
Police risk of being killed by a nonblack: 4.29 per 100,000 police (risk from pop. of 274 million)
Police risk of being killed in America: 8.10 per 100,000 (each year the last 10 years)

Based on these numbers:

A black is 5.4 times as likely to kill an officer as a non-black. WSJ says 5.6 times.
A black is 2.5 times as likely as a white to be killed by an officer. WSJ says 3 to 4 times.

According to DOJ:

Blacks are 3 times as likely as whites to commit felonies.
Blacks are 5 to 6 times as likely as whites to commit murder.

True, according to WSJ, blacks are 3 to 4 times as likely as whites to be killed by police. But according to WSJ, blacks are 5.6 times as likely to kill police as non-blacks.

Let's look at cop killers—51 cops killed in a year. 24 cops in a year were killed by blacks (per 100,000 blacks that would be... 0.05 per 100,000). Let's pretend the remaining 27 cops killed in a year were killed by whites and white-Hispanics put together (per 100,000, that would be 0.01 per 100,000). (Let's pretend no Asians, Pacific Islanders, Arabs, or American Indians kill cops.)

FYI: Out of 245,532,000 whites & white-Hispanics, 197,816,000 are whites—that is white non-Hispanics, which leaves roughly 47,000,000 white Hispanics, out of roughly 54 million total Hispanics, which is supposedly 17% of the U.S. total population of 318.9 million in 2014. ALSO FYI: In 2013, the black population, including mixed-race blacks, was estimated at 45 million, 15.2% of the population. Those who called themselves only black were 13.2%, over 41.7 million.

U.S. POPULATION: 319 million (2014)
Whites & white Hispanics - 246 million (77%)
Whites - 198 million (63%) (white, non-hispanic)

Hispanics - 54 million (17%)—RAPIDLY GROWING

Blacks & mixed-race blacks - 45 million (14%)

Blacks - 42 million (13%)

Asians - (5%)—RAPIDLY GROWING

NOTE: How many police in America?

Kent Osband of WSJ says 630,000 officers, March 2015.

"[The Skeptical Libertarian](#)" claims more than 900,000 sworn law enforcement officers 2014. [Wikipedia](#) claims there were 1,220,000 officers in 2008 (or 373 per 100,000).

Jeb Bush said we have 800,000 cops on the beat in December 15, 2015, CNN GOP debate

BLACK COP KILLERS VS NON-BLACK COP KILLERS:

cop killings by blacks (24) per total blacks & mixed-race blacks (45 million): 0.0533 per 100,000

cop-killings by non-blacks (27) per the rest of the population (274 million): 0.0099 per 100,000

From this, blacks are 5.4 times as likely to kill cops as non-blacks.

However, I would like to know about Hispanic cop killers.

THE NUMBERS VARY:

(From Max Kutner, [Newsweek](#), March 2015: "Who Kills Police Officers?")

There was a study authored by Dr. Michael Stone, a professor at the Columbia College of Physicians and Surgeons and former host of a Discovery Channel show about murderers, *Most Evil*. The study was available in March 2015 in the journal *Violence and Gender* and explores the 74 police officers killed in 2013 and 2014 and identifies trends among the 70 killers.

According to the study, people intentionally killed 43 on-duty police officers in the continental United States in 2014, a number about 1.5 times higher than the figure for 2013, which was 31. Stone says the uptick last year is likely related to the anti-police sentiment that has gripped the country, though the 2014 number was still well below the 121 killings in 2012(!) and 72 in 2011.

In 2013, 44 percent of cop killers were white, 37 percent were black and 11 percent were Hispanic. Last year, 54 percent were white, 26 percent were black and 18 percent were Hispanic. In those years there was also one Native American, one Inuit man and one Chechen, Dzhokhar Tsarnaev, who was convicted in the Boston Marathon bombing and also, we believe, killed a Massachusetts Institute of Technology police officer in the days after the bombing.

Most often, Stone found, police killings occurred when officers attempted to question or arrest the eventual killers. Every cop killer in 2013 and 2014 was male; half were involved in crimes just before murdering the officers, and half killed for reasons such as cop-hating beliefs or mental health conditions. Almost all used guns to kill the officers and half of the killers died during their altercations, either by suicide or at the hands of other officers.

The ages of the killers spanned from 15 to 88, with three-quarters of the total between 18 and 37. Psychiatric disorders were seen in about one in eight, though those individuals were not necessarily "grossly psychotic," Stone writes. Unlike mass murderers, who "usually plan their murder well in advance," he adds, "men who kill police officers...usually do so on impulse."

Another Big Lie Exposed: Black Cop Writes Fake Racist Letter (Colin Flaherty, [American Thinker](#), Dec. 5, 2015)

Black former officer Clive Higgins (misspelled Calvin Higgins) [confessed](#) to writing a fake "White Power" letter.

The fake letter is just the latest example of how prominent or public black people lie about racism, but see their deceit exposed, often on video.

(In November 2015) a black student at Kean University in New Jersey left a Black Lives Matter rally to open a fake twitter account that she used to issue false threats of violence against black people from white people.

Earlier this year in Texas, a black member of the state legislature accused a state police officer of being abusive and racist during a traffic stop. [Video showed the opposite](#).

A [Texas journalism professor complained](#) that two police officers were racist and abusive toward her. A video showed the opposite.

Former NFL star Lamar Lathon [told a Houston TV station](#) that police were abusive and racist towards him during a traffic stop. Video shows the opposite.

And of course last year in Hollywood, an actress [from Django Unchained](#) said police were racist and abusive towards her after they investigated a complaint that she and her boyfriend were having sex in their car. On busy street. In the middle of the day. (The police officer's audio recording) showed the cop was unfailingly polite, despite her abuse. However, the officer was punished by LAPD for releasing the audio.

There are [lots of other examples](#).

INACCURATE STATEMENT in AlterNet: "Around 90 percent of black homicide victims are killed by black offenders, while white people kill each other at roughly the same rate."

Article: "The Distorted Exaggeration of Black-on-Black Crime Ignores Much of America's Criminality—American discourse on crime is deeply politicized and influenced by racial and class bias." - ([Adam Hudson](#), [AlterNet](#), Jan 2015)

A MORE ACCURATE STATEMENT: Blacks kill one another at least 4.4 times the rate per capita that whites kill one another.

Murders in 2011 (FBI):

white-on-white: 2,630 (victim rate 1.34 per 100,000 for reported cases)

black-on-black: 2,447 (victim rate 5.83 per 100,000 for reported cases)

A note about Donald Trump's retweet:

The meme he retweeted in November 2015 on "USA crime stats in 2015" essentially flip-flopped the proportions of black-on-white vs. white-on-white murders.

Trump retweeted a careless inaccuracy from right wing media. However, the message he meant to disprove is also inaccurate: That blacks are targeted by "racist" police and justice system.

Recognize that Think Progress and others took no issue with the false notion that any significant number of police killings of blacks or whites are "crime" (or in Think Progress's words, "murder"). We believe it was Washington Post that admitted that most homicides by police are justifiable and are rarely "murder."

Further, the facts remain that:

Blacks kill blacks at more than 4 times the rate per capita that whites kill whites. (From FBI homicide stats). Blacks kill about as many blacks, raw numbers, as whites kill whites--and the white population is nearly five times the size of the black population. (Blacks possibly kill more blacks than whites kill whites, considering **murder arrest rates drop as low as 25% in liberal-run crime hotbeds like Chicago**, compared with the national average 60% murder clearance rate). (From FBI homicide stats and various sources on murder clearance rates)

Blacks kill more than twice as many whites, raw numbers, as whites kill blacks. (From FBI). Which means **blacks are nearly 12 times as likely to kill whites as whites are to kill blacks.** (From FBI stats put against US population numbers)

Police are 6 times as likely to be murdered by blacks as blacks are to be killed by police. (From Wall Street Journal). **When police kill blacks it is nearly always justifiable homicide.** (From Washington Post)

Blacks are 5.6 times as likely as nonblacks to kill a police officer (but only 3 to 4 times as likely as whites to be killed by police). (From [Wall Street Journal](#)). **In a decade, blacks committed 47% of cop killings, although they were only 13% of the population.** There is an average of 51 police murdered in the line of duty in the country each year, and an average of 24 of the cop killers are black. (From FBI and Wall Street Journal).

A comment on blacks being killed by police: Blacks are much more likely than whites to commit violent crimes, resist arrest, and kill police, so blacks are more likely to be killed by police. (From DOJ, FBI, Wall Street Journal, San Francisco police).

A note on police being killed by blacks: We've seen a number of cop killings inspired by Black Lives Matter agitators and media-driven stories like Eric Garner, Michael Brown, and others.

Blacks are three times as likely to be felons as whites. (From DOJ).

True, many of the blacks killed in these stories are "unarmed," as the liberal media likes to highlight, but what they downplay in headlines factual details like "resisting arrest," "disobeying police orders," or "assaulting the officer." Whether the suspects were armed or "unarmed" is a ham-fisted litmus test on whether the killings are justifiable or questionable. Taken case-by-case, we find that every black killed was reasonably perceived as a threat to police or community, was violently resisting arrest, or was brazenly disobeying officer commands and requests:

- **Trayvon Martin** (not a police case, but neighborhood watch) was a case of self-defense: Trayvon, age 17, height 5'11", was [grounding and pounding "MMA-style"](#) on George Zimmerman, according to eye-witness testimony. Zimmerman had a fractured nose and lacerations to the back of the head—he reported Trayvon slammed his head on the concrete repeatedly, and he thought he was going to lose consciousness. There had been [burglaries, home invasions, and thefts](#) in the area. Trayvon had been found with 12 pieces of women's [jewelry](#), a watch, a large flat-head screwdriver described as a "burglary tool" in his backpack (as well as a [marijuana](#) pipe and a plastic bag with residual drug content) but was not charged by the School Resource Officer who caught Trayvon tagging at his school on camera. Trayvon did not buy "iced tea" but [Arizona Watermelon juice](#) which is used to enhance a high. Zimmerman reported that Martin was walking in the rain suspiciously through the neighborhood. Trayvon told his girlfriend on the phone about a "creepy ass cracker" watching him. Trayvon [may have doubled back](#) to creep up on George. As George was walking back to his vehicle, according to George, Trayvon emerged from the darkness and asked George, ["You got a problem?"](#) When George said no, Trayvon said, "You do now," and attacked him. At one point Trayvon saw the gun and told Zimmerman, "You're gonna die tonight, motherfucker."

- **Michael Brown** was assaulting the officer and allegedly attempted to murder the officer with his own weapon. "Hands up, don't shoot" was a lie repeated by some (thankfully not all) black eye witnesses, black professional football players, black Congressional staffers, legislators, CNN pundits, Mexican restaurant employees, and Black Lives Matter agitators.
- **Eric Garner** died resisting arrest in his poor health--a healthy person would not have died from an alleged "choke hold." Suspects frequently cry out in pain to dramatize their arrest and in attempt to manipulate people's perceptions as well as police themselves; police cannot immediately get off of any petty criminal resisting arrest who cries, "I can't breathe."
- **Tamir Rice** had scared neighbors at a park, waving a realistic looking replica of a handgun (an Airsoft gun), and allegedly refused orders to put his hands in the air, but instead reached into his waistband where he had what the police were told by the dispatcher was a gun.
- **Walter Scott** allegedly fought with the officer and may have tasered the officer with his own weapon. He was shot in the back immediately after this assault, fleeing the officer as a possibly armed man (with a taser) for a second time, this time after escalating the situation with violence toward an officer.
- **Sandra Bland** invited suspicion by disobeying police requests; she was yelling, cussing, and implying racism; she allegedly kicked the officer. In jail, she then hanged herself, depressed because, among other things, her "friends" never showed up to bail her out of jail.
- **Sam DuBose** was refusing to answer police questions before attempting to flee the officer; he drove with the officer hanging on the side of the car and refused two commands to stop, dragging the officer 15-25 feet; he gave no indication that he would have stopped and might have otherwise run over the officer. The car, according to two officers present, posed a threat of great bodily harm, driven by a reckless, dangerous criminal.

7.44% of African Americans in the United States could not vote due to a felony conviction in 2016. In Kentucky 26.15% of African Americans were disenfranchised - the highest percentage in all US states. Florida had the highest total (1,686,318) and per capita (10.43%) disenfranchised population of all US states.

Men (83%) accounted for a larger percentage of persons convicted of a felony, compared to their percentage (49%) of the adult population.

Whites comprised 82% of adults in the U.S. population, compared to 60% of persons convicted of a felony. Blacks comprised 12% of the adult population, but 38% of convicted felons.

In 2006 similar proportions of whites (66%) and blacks (72%) convicted of a felony in state courts were sentenced to a period of confinement.

Among felony offenders sentenced to state prison during 2006, the average sentence received by blacks (5 years and 3 months) was not significantly different from the average sentence received by whites (5 years).

(9) THE TRUTH ABOUT DOJ'S FERGUSON REPORT (March 2015):

Eric Holder's Department of Justice released a report exonerating former Officer Darren Wilson of credible charges in the death of Michael Brown—but alleging that Ferguson PD had disproportionate arrests, fines, and prosecutions of blacks, out of sync with national statistics on citations, arrests, etc. But the report failed to show any differences.

A look at rates of blacks being ticketed for traffic violations nationally show that Ferguson PD is actually slightly more lenient on blacks than the national averages. Nationally, blacks are 31% more likely to be pulled over than whites. Men are 42% more likely than women to be pulled over—far above what blacks in Ferguson suffered.

Further, a look at national statistics on blacks dying in car accidents suggest that blacks are more frequently high-risk drivers, and/or drive in high-risk areas. Blacks die in car accidents at about twice their share of car owners. A 2006 National Highway Traffic Safety Administration study found blacks killed in accidents have the highest rate of past convictions for speeding and other moving violations.

The DOJ Ferguson report said blacks are 50% more likely to have their cases lead to an arrest warrant, and accounted for 92% of cases in which an arrest warrant was issued by Ferguson in 2013. But the report does not take into account blacks commit more violent crime per capita than whites, nor does the report look into whether blacks paid their fines or appeared in court, the failure of doing which can lead to more arrest warrants.

The facts show that Ferguson (as with St. Louis) is a city strapped for cash, much like Milwaukee, Nashville, and Washington, D.C., in which local governments resort to alternate sources of revenue: Rather than high taxes, they use exorbitant fines and ticket citations, as St. Louis economists admit. Are blacks suffering "discrimination" or typical city fines? Evidence points to the latter.

The state of Missouri says that in 2012, blacks were 12% of the population but constituted 65% of murder arrests and 62% of murder victims. Blacks are 67% of the Ferguson population and were 85% of traffic stops, 90% of citations, and 93% of arrests from 2012-2014. So blacks in Ferguson may be overrepresented by 50% in police arrests, but blacks in Missouri are overrepresented by 400% as murderers and murder victims. Could murder rates indicate blacks may also commit lesser infractions at wildly higher rates?

THE TRUTH ABOUT "RACIST JOKES": The racially-tinged jokes among a number of the officers belies a jocular, non-politically-correct atmosphere that is arguably common in rough, masculine settings such as among policemen, firemen, sports coaches, athletes, in sports bars, and among groups of friends of any race, especially males, and prove nothing about the hearts, minds, or prejudices of the officers who sent or received the emails.

3251 black homicide victims in 9 years in one city, versus 3,466 extrajudicial executions in 86 years in the whole United States.

Most lynchings were for alleged robbery, rape, and murder. Some were falsely accused, and some were lynched for violating local customs and sensibilities — all without official due process in front of a court, judge and jury. Some whites were reportedly lynched for being abolitionists or proponents of equal rights for blacks. Supposedly, homosexuals, Catholics, Mormons, and Jews were also attacked by groups such as the KKK.

According to some, photographs of lynchings by whites included notation, while photographs of lynchings committed by blacks had no documentation.

(12) MURDER RATES AND DRUGS

- [Pew Research](#) on murder rates 1985-2012

According to the FBI figures, Flint, Mich., had the highest murder rate of any sizeable U.S. city in 2012, the most recent year available. There were 62 murders per 100,000 population (which, coincidentally, was just about Flint's estimated population that year). Trailing Flint were Detroit (54.6 murders per 100,000), New Orleans (53.2 per 100,000) and Jackson, Miss., (35.8 per 100,000). Chicago, whose population is several times bigger than any of those cities, came in 21st, with 18.5 murders per 100,000 — nearly quadruple the national average, true, but still nowhere near the highest in the country. (It's worth noting that New Orleans didn't report data in 2005, the year Hurricane Katrina struck.)

In fact, what's striking is that from 1985 through 2012 only six cities have held the anti-honor of having the nation's highest murder rate: New Orleans (12 times, most recently in 2011); Washington, D.C. (eight times, most recently in 1999); Detroit (four times, most recently 2006), Flint, Mich. (twice, also in 2010); Richmond, Va. (once, in 1997) and Birmingham, Ala. (once, in 2005).

Another thing that jumps out from looking at the murder-rate data: How the threshold for having the nation's highest murder rate has fallen since the early 1990s, when the nation's crack epidemic helped push violent-crime rates to record highs. In 1994, for instance, New Orleans led with 85.8 murders per 100,000; the next two cities, Richmond, Va., and Washington, D.C., had rates of 70 or more per 100,000. Even in terms of raw numbers, Chicago has come a long way: In 1994 the city had 928 murders. Today Chicago typically has 500-600 murders in a year. ([PewResearch](#))

NOTE: Murder rates in our most violent cities have been reduced 30% to 50% from the time of the crack epidemic in the early 1990s compared with today.

U.S. City with Top Annual Murder Rate: 1994 vs. 2014

1994: New Orleans: 86 per 100,000

2014: Detroit: 43 per 100,000

NOTE: 2012 had cities with murder rates in the 50s and 60s. As did 2015.

[NY Times](#): Rise in Murders Has St. Louis Debating Why

Murder rates have fallen sharply in most of the country. But **St. Louis** is one of a few major cities, including **Memphis** and **Washington**, where the number of homicides jumped last year. It is also one of several cities, including **Baltimore**, **Detroit**, **Gary**, Ind., and **New Orleans**, where violent crime, concentrated in low-income minority neighborhoods, has remained stubbornly high, though down from the crack-driven peaks of the early 1990s. ([NY Times](#), Feb 2015)

DALLAS ON MURDER AND DRUGS:

Murders in Dallas dropped to 137 in 2013, continuing the steady decline from 226 murders just a decade prior. First Assistant Chief Cindy Villarreal told [The Dallas Morning News](#) that a renewed fight against drug-dealing was the reason for the decline. ([DailyBeast](#))

From Washington Post:

1/3 of black males will spend time in state or federal prison, double the rate from the 1970s, and 5x higher than for white males. Arrest rates have fallen for violent and property crimes, but soared for drug crimes: In 2011, drug crimes were 14% of all arrests, and "drug paraphernalia" an additional 31% of all arrests. Only 6% and 14% of arrests were for violent and property crimes.

23% of drug offense arrests were of black people in 1980, which grew to 41% in 1991. Blacks are 3.6 times as likely to be arrested for selling, and 2.5 times as likely to be arrested for possession than whites.

In 1980, whites were 45% more likely to sell drugs, similar to in 1989. In 2012, 6.6% of white adolescents ages 12-25 sold drugs, while 5% of blacks did.

"Whites more likely to [admit they] deal drugs, blacks more likely to get arrested"

([WashingtonPost](#)) (BROKEN LINKS)

QUESTION: Does Washington Post consider the possibility that the increase in drug arrests and prosecutions has decreased violent crime?

PHRASED ANOTHER WAY: Is it possible there is an inverse relationship between drug arrests and violent crime? More drug arrests & sentences: Less violent crime?

An Analysis of Out-Of-Wedlock Births in the United States (Paper, August 1996, by [George A. Akerlof](#) and Janet L. Yellen) ([Brookings](#))

NOTE: The Brookings paper at first claims that LBJ's Great Society / welfare benefits did not affect out-of-wedlock births overall, but within the paper, the writers admit that welfare did increase out-of-wedlock births for the less-wealthy black community.

From Walter Williams, George Mason University professor: The True Black Tragedy: Illegitimacy Rate of Nearly 75% ([CNS News](#))

"Hustlers and people with little understanding want us to believe that today's black problems are the continuing result of a legacy of slavery, poverty and racial discrimination. The fact is that most of the social pathology seen in poor black neighborhoods is entirely new in black history. Let's look at some of it.

"Today the overwhelming majority of black children are raised in single female-headed families. As early as the 1880s, three-quarters of black families were two-parent. In 1925 New York City, 85 percent of black families were two-parent. One study of 19th-century slave families found that in up to three-fourths of the families, all the children had the same mother and father.

"Today's black illegitimacy rate of nearly 75 percent is also entirely new. In 1940, black illegitimacy stood at 14 percent. It had risen to 25 percent by 1965, when Daniel Patrick Moynihan wrote "The Negro Family: The Case for National Action" and was widely condemned as a racist. By 1980, the black illegitimacy rate had more than doubled, to 56 percent, and it has been growing since. Both during slavery and as late as 1920, a teenage girl raising a child without a man present was rare among blacks.

"Much of today's pathology seen among many blacks is an outgrowth of the welfare state that has made self-destructive behavior less costly for the individual. Having children without the benefit of marriage is less burdensome if the mother receives housing subsidies, welfare payments and food stamps. Plus, the social stigma associated with unwed motherhood has vanished. Female-headed households, whether black or white, are a ticket for dependency and all of its associated

problems. Ignored in all discussions is the fact that the poverty rate among black married couples has been in single digits since 1994.” (H/T [Eagle Rising](#), [CNS News](#))

(15) POVERTY: Some say “poverty causes crime.” Others say “crime causes poverty.”

Poverty rate, 1940 (Walter Williams):
blacks: 87%

Poverty rate, 1966 (Pew Research):
whites: 11%
blacks: 42%

Poverty rate, married families, (2014, Walter Williams):
white married couples: 5%
black married couples: 8%

Poverty rate, 2012, ([Kaiser Family Foundation](#)):
whites: 10% (Census Bureau: 13%)
blacks: 27% (Census Bureau: 35%)

Unemployment: Whites: under 5%, Blacks: about 10%*
*(Not accounting for falling labor force participation rates)

Out-of-wedlock birth rate: whites 28%, blacks 73%

Abortion: White women: 13.9% of pregnancies; Black women: 32% of pregnancies

Felony rate, 2004: whites 330 per 100,000, blacks 1,178 per 100,000

Blacks double or triple whites in poverty, unemployment, out-of-wedlock birth, abortion, and felony rates.

“Jail survey: 7 in 10 felons register as Democrat” Paul Bedard, 2014 ([WashingtonExaminer](#))

“Guess What, Felons Favor Democrats” John Lott, 2010 ([FoxNews](#))

(17) ABORTION:

Could high abortion rates deaden the conscience of the communities practicing abortion?

Abortion annually (averages from CDC and Guttmacher Institute)

black abortions: 428,510 (1,173 per day; we've seen estimates of 1,000 per day)

white abortions: 456,161 (1,248 per day)

Black women abort 32% of pregnancies (or 30% according to 2013 numbers from CDC, per [Abort73](#))

White women abort 13.9% of pregnancies (not including morning-after pill)

Abortion victimization rate (annual):

black abortions: 1,020 per 100,000 total blacks

white abortions: 232 per 100,000 total whites

Blacks abort the equivalent of 1% of their population every year.

Black women commit 30.0% to 35.4% of abortions, killing 994 to 1,174 of their own black babies in the womb each day—362,810 - 428,510 per year.

White women commit 36.0% to 37.7% of abortions: 1,193 to 1,250 white babies killed by abortion per day, 435,591 - 456,161 per year. ([Abort73](#))

In 2000, blacks made up [17 percent of live births](#), but [36 percent](#) of abortions. ([FoxNews](#))

PREGNANCY:

Black pregnancies annually: 1,339,094 (roughly 1/3 end in abortion)

White pregnancies annually: 3,281,734 (roughly 1/7 end in abortion)

Annual pregnancies per total population:

Blacks: 3,188 pregnancies per 100,000 total blacks (32% aborted: 1,020 per 100,000)

Whites: 1,666 pregnancies per 100,000 total whites (13.9% aborted: 232 per 100,000)

Note: Whites are a shrinking population in America.

NEW YORK CITY ABORTIONS:

In New York City, in 2009, 57% of black pregnancies ended in abortion. ([WNYC](#))

In NYC, 2012, again, 56% of black pregnancies ended in abortion—24,758 black babies born, 31,328 aborted. ([Breitbart](#))

(18) WELFARE:

Could government dependence and entitlement replace a sense of life consequences, moral agency/responsibility? And has government replaced fathers/husbands as provider and moral guide?

82,679,000 of the welfare-takers lived in households where people were on Medicaid, said the Census Bureau. 51,471,000 were in households on food stamps. 22,526,000 were in the Women, Infants and Children program. 20,355,000 were in household on Supplemental Security Income. 13,267,000 lived in public housing or got housing subsidies. 5,442,000 got Temporary Assistance to Needy Families. 4,517,000 received other forms of federal cash assistance. ([CNS News](#))

There are 110,489,000 people on welfare, 41.7 million on food stamps, 10.2 million on unemployment insurance. 35.4% of the population is on welfare. Total govt spending on welfare (excluding food stamps and unemployment): \$131.9 Billion. ([StatisticBrain](#))

With regard to AFDC (Aid to Families with Dependent Children), the figures are: White 38.8%, Black 39.8%, Hispanic 15.7%, Asian 2.4%, other 3.3%.

Black Americans make up 32% of welfare recipients. Black Americans are more than [twice as likely](#) to have been on welfare than White Americans. ([DailyKos](#))

Supplemental Nutrition Assistance Program (SNAP): According to U.S. Department of Agriculture data, which administers welfare [at least SNAP benefits], in 2013: 40.2 percent of SNAP recipients are white, 25.7 percent are Black, 10.3 percent are Hispanic, 2.1 percent are Asian, 1.2 percent are "Native American." (21) OPIOID CRISIS:

Opioid Overdose Deaths by Race/Ethnicity, Timeframe: 2015 ([Kaiser Family Foundation](#))

White: 27,056 (82%) 13.6 per 100,000

Black: 2,741 (8%) 6.5 per 100,000

Hispanic: 2,507 (8%) 4.6 per 100,000

Context: Black-on-black murder victimization (4.9 per 100,000) nearly quadruples the white-on-white murder rate (1.3 per 100,000 in 2014).

(White, Non-Hispanic; Black, Non-Hispanic; Hispanic)

TOTAL: 33,091

Whites are more than twice as likely as blacks to suffer opioid OD; whites are almost 3 times as likely as Hispanics to suffer Opioid OD.

Main states: OH, NY, CA, FL, MA, IL, PA, MI, TX, NC, MD, TN, KY, NJ, GA, VA, MO, WA, CT, AZ, WV, WI, SC, IN, CO, UT, OK, NV, NH, NM, MN, OR, LA, AL, RI, ME, AR, IA, KS, MS, DE, DC, ID, AK, VT, HI, NE, MT, WY, ND, SD

NOTE: Whites are 63% of the population, overrepresented by 19% points. Blacks are 13% of the population, under-represented by 5% points. Hispanics are 17% of the population, under-represented by 9% points. Total population is 319 M, 10.4 per 100,000

(22) SUICIDES

****ON THE RISE FOR AMERICAN INDIANS / ALASKA NATIVES and WHITES****

Rate of Suicide by Race/Ethnicity

United States 2000-2014 ([Suicide Prevention Resource Center](#))

In 2014, the rate of suicide among American Indians/Alaska Natives was 17.47 per 100,000 and among whites it was 17.61. In contrast, the suicide rate among Asian/Pacific Islanders was 6.26; the rate for blacks was 5.63; and the rate among Hispanics was 5.86.

Among American Indians and Alaska Natives, suicide rates peak during adolescence and young adulthood, then decline. This is a very different pattern than among other racial and ethnic groups.

whites: 17.61 per 100,000
American Indians: 17.47 per 100,000
Asians: 6.26 per 100,000
Hispanics: 5.86 per 100,000
blacks: 5.63 per 100,000

Whites are more than 3 times as likely as blacks (or Hispanics) to commit suicide. Whites are almost 3 times as likely as Asians to commit suicide. Whites are about as likely as American Indians to commit suicide, although among American Indians their suicides are mainly among adolescents and young adults.

Facts about Veteran Suicide

- July 2016 [Veterans Affairs \(PDF\)](#), VA Suicide Prevention Program

2014 (huge increases since 2001)
civilian adults: 15.2 per 100,000 (rate has increased 23% since 2001)
veterans: 35.3 per 100,000 (increased 32.2% since 2001)
civilian adult males: 26.2 per 100,000
veteran males: 37 per 100,000 (increased 30.5% since 2001)
civilian adult females: 7.2 per 100,000 (increased by 39.7% since 2001)
veteran females: 18.9 per 100,000 (85.2% since 2001)

In 2014, there were 41,425 suicides among U.S. adults. 18% were veterans (Vets are 8.5% of population)

*Note: In 2010, Veterans accounted for 22% of all deaths from suicide and were 9.7% of the population

In 2014, approximately 65% of all Veterans who died from suicide were aged 50 years or older.

Differences between men & women veterans to civilians:

- risk for suicide was 18% higher among male Veterans compared to civilian adult males. (2014)
- risk for suicide was 2.4 times higher among female Veterans compared to civilian adult females. (2014)

DETAILED DESCRIPTIONS:

1. **CONVENIENCE STORE ROBBERY-ARSON: Palestine, TX, aggravated robbery, arson, 2019**, Texas convenience store, a black male suspect, 40-year-old Robert Thompson, seen on security camera video dousing two females, a white female store clerk and a white female customer, Della Witt-Denizeri, as they lay on the floor behind the counter. He then attempted to light the lighter fluid on the floor, but then walked over to the Della, to light her directly on fire before he left the scene. She was able to put out the flames after they grew around her upper body and head for several moments. The victims were bound with duct tape. Felon got life in prison ([KLTV](#) Feb 2020, Arrested in Feb 2019 [KLTV](#), [NBCDFW](#), [Fox News](#))
2. **LESBIAN 'LOVERS' KILL BABY: Louisiana, kidnapping, murder of baby, July 2018**, 25-year-old black woman (apparently a lesbian?) Felicia Marie-Nicole Smith "kidnapped" her white girlfriend Hanna Nicole Barker's white baby, Levi Cole Ellerbe (a 6-month-old boy), set him on fire and left him for dead on train tracks—to please her girlfriend, the mother. The baby boy died, and both mother and mother's black girlfriend face charges as of March 2020. The mother is accused of asking the black woman to burn her son "to bones" to hide evidence. ([The Sun](#) 2020, [Daily Wire](#) 2018, [ArkLaTex](#) 2018)
3. **ROBBERY-MURDER OF NEIGHBOR: Birmingham, AL, robbery-murder, August 2016**, 18-year-old black male Thomas Sims allegedly stabbed and set 85-year-old white veteran Gene Emory Dacus (known affectionately as "Mr. Gene") on fire in his backyard.

His car had been stolen 3 weeks before. His pickup truck disappeared around the time of the killing. He was also robbed of his wallet. The victim's son Gary said the suspect hit his father in the head, left the scene and then returned and set him on fire to try to conceal the crime. Police found him burned in the back of his home after midnight. Witnesses told police they saw a fire in the yard before seeing a man running down a nearby alley with a red gasoline jug. Police arrested Sims a short distance from the crime scene. Thomas Sims had been arrested just seven months before that when he was in possession of a 2013 Toyota RAV that had been stolen during a Jan. 14 carjacking. The victim in that case had been hit with a gun. SOURCES: "Alabama Teen Indicted On Murder Charges After Lighting Korean War Veteran On Fire" ([AmericanMilitaryNews](#)). 4. **FUNERAL HOME OWNER (CLIP): Pittsburgh, PA, murder, June 2016**, 83-year-old John "Jack" Connors, a trusting, independent funeral home owner who let young guys stay with him, beaten and burned, found dead in second floor apartment by first responders after 911 call of man on fire, allegedly by a man they arrested, Jawwaad Ali, 24, and charged with homicide in connection with Connors' death. Police said Ali, who told investigators he had been staying with the victim for about a week, beat Connors and set him on fire. Police: Man arrested in 83-year-old's death beat victim, set him on fire ([WPXI](#)).
 - a. UPDATE: ([Pittsburgh Post-Gazette, Sept 22, 2017](#): "Mount Oliver man found not guilty of fatally beating, burning elderly man") — despite giving police three different stories, and allegedly refusing to be recorded in interviews. Jawwaad's black defense [attorney Randall McKinney](#) accused police of a forced false confession, and tried to pin the crime on another man, Thomas Zurick, 36, who testified for the prosecution. Zurick had allegedly had an argument with Connors a week and a half prior and came as Connors was burning to help him cash a check. Ali told him Connors was burning.
 - b. Ali [gave police three different stories about what happened that day](#) and that in his final version of events he gave police details about the attack that only the killer would know. (**First**, Mr. Ali told police he awoke to smoke and found Mr. Connors on the floor on fire. **Then**, he said a man arrived at the house at 6 a.m. with a gun, and held Mr. Ali and Mr. Connors hostage. The attacker made biblical comments before forcing Ali to pour kerosene on Mr. Connors, lighting him on fire and fleeing.) **In that last story**, Mr. Ali said that Mr. Connors made sexual advances on Mr. Ali and then threatened him with a screwdriver, causing Mr. Ali to defend himself by knocking Mr. Connors to the floor and kneeling him in the head, before lighting him on fire. "Jawwaad goes on to explain exactly what science would show later," Ms. Fleming said, noting that Mr. Connors' injuries could have been inflicted by a knee to the head.
 - c. ([Post-Gazette, Sept. 20, 2017](#): "Trial begins for man in Allentown beating death, fire") The prosecutor, Ms. Assistant District Attorney **Rachel Fleming (A FEMALE BOTCHED THIS?)**, said that Jawwaad Ali had kerosene on his socks, shoes and T-shirt — which investigators believe was poured on Mr. Connors'

body and set on fire after he had been killed. Ms. Fleming noted that Mr. Connors, 83, was 5 feet 4-1/2 inches tall and weighed 139 pounds. Mr. Ali was 24 years old, 6 feet tall and weighed 175 pounds. ([Acquitted, WTAE](#))

5. **HOMELESS: South L.A., attempted murder, May 2016**, don't know victims' race: homeless man Phillip Darryl Cole put lighter fluid on two fellow homeless people (not named, not sure race) and set them on fire. He was charged with attempted murder. ([ABC7](#)) (Note: there are many instances of the homeless setting one another on fire more recently, including at least one white perp.)
6. **INTERRACIAL FAMILY: Pomona, CA, torture murder, 2015**, 41yo white mother Dawn Hensley was doused and lit on Christmas Day by boyfriend 51yo Clarence Durell Dear, black father to her four children. ([KTLA](#)) The incident occurred about 2 p.m. Friday, Dec. 25, on Cordova Street in Pomona. Neighbors who saw the victim running out of her home in flames came to her aid. She was taken to a hospital, where she later died. Dear fled the scene, police said. He was arrested Sunday morning after being spotted boarding a bus in Altadena. The younger children were put in foster care, and the older son and daughter sought to reunite with their siblings. The eldest son [Nigel Henley received a free car](#) from a local business. UPDATE: The daughter [Corin Michella "Flower" Hensley](#) was also murdered in Pomona just over a year later at age 25 in January 2017, along with her 34-year-old boyfriend, LaVelle Brown, in a vehicle, leaving behind their own three young children.
7. **FIGHT WITH GASOLINE ON HIGHWAY: Baltimore, MD, double homicide, Dec. 2015**, half-white, half-black guy David Campbell (succumbed to his injuries by Jan 2017), 22, whose best friends were white (including the man who [raised money](#) for him, Cody Yeager). Campbell was doused in gasoline and lit on fire after punching black coworker Christopher Harrison Jr., 28, in what was supposed to be a fistfight over a girl or another ongoing beef. Coworkers including Harrison were walking back from a gas station with gas cans on the side of a road. Campbell, while on fire, ran into the other victim carrying a can who was engulfed in flames. White male Shawn Scarinzi, a bystander also carrying gasoline along with the perp, was bumped into by the first victim, Campbell, and died nearly two years later at age 25 in 2017 ([Baltimore Sun/Capital Gazette](#) 2017, [DailyMail](#) 2015, [BaltimoreSun](#) 2015, Colin Flaherty before YouTube terminated his account)
8. **NEIGHBOR'S GRANDSON BURGLARY: Detroit, MI, murder & arson, 2015**, white 91yo Paul Monchnik, beaten and his house lit on fire by neighbor's black 17yo grandson George Robert Stewart IV, who intended to rob the home. He went and bought gasoline to destroy the evidence. The victim's next-door neighbor and the murderer's grandfather, George Jr., turned his grandson in for questioning; two of the boy's aunts recognized him in surveillance footage. But the perpetrator's remarried mother, Syretta Moore, said, "We believe he's innocent. He did not do the killing. He did not set that man on fire. There's a lot more going on. There's more to the story.... George is a good kid. He goes to church, he was on the basketball team and a good athlete. He didn't do this." ([Detroit Free Press](#), [11/24](#), [11/25](#), and [12/10](#); [Detroit News](#))
9. **TEENAGE WOMAN MURDERED: Courtland, MS, murder, Dec. 2014, Jessica Chambers, 19**, the perp(s) poured lighter fluid into her mouth and nose and set on fire in

her car; she died in the hospital. She'd been dating a black guy. First responders said she looked like a zombie and Chambers told them someone named "Eric" or "Derek" burned her ([CBS News](#) 2017). 17 arrests, mostly drug and gun related crimes of suspected gang members, and one black 27-y-o [Quinton Tellis was indicted](#). Capital murder suspect **Quinton V. Tellis** has gone through two mistrials in the Jessica Chambers case ([Clarion Ledger](#) 2019). Tellis was **also accused of torturing and stabbing to death a presumably Asian woman named Ming-Chen Hsiao** in Monroe, Louisiana ([Clarion Ledger](#), 2019). Tellis's bond was lowered to \$300k in the second murder. At an Oct. 23, 2019 hearing, Judge Larry Jefferson reduced bond for Tellis to \$300,000 on a second-degree murder charge. 10. **AMERICAN EAGLE MANAGER: Fort Worth, TX, murder, 2014**, American Eagle assistant manager Ashlea Harris, 31, strangled, beaten, bound, and her apartment lit on fire by two ex-coworkers, black male Clarence "David" Mallory, 19, and older Hispanic girlfriend Carter Carol Cervantez, 25, both of whom the victim had earlier identified as suspects stealing cash from the store safe but they were never arrested ("NON-VIOLENT" CRIME! They were fired that summer); on the night of the murder, they stole her keys to do it again and were followed by police. Mallory was arrested for not having his driver license ([Star-Telegram](#), [Daily Mail](#) 2014). [Ms. Cervantez](#) was sentenced to life without parole in May 2016; she was called the mastermind by prosecutors. Mr. Mallory was sentenced to life without parole in August 2017, when he was 22 (he was 19 at the time of the murder). They stalked Black Friday murder victim 'like people stalk a deer,' prosecutor says. ([Star-Telegram](#) 2017, also [Express Digest](#)).
11. **CAB DRIVER MURDER (CLIP): Hanover County, VA, murder, Aug. 2014**, cab driver **James M. Wells**, age 26, a Navy Veteran, was abducted, repeatedly stabbed, and burned alive with a flare by black couple who panicked when they could not pay the fare: **Dyshawn D. Simpson, 20, and his girlfriend Alisa N. Dejesus, 19**, seven months pregnant, who drove the taxi as Wells moaned in pain after being stabbed. Simpson pleaded guilty in August. Simpson looked at his mother and the family of Wells and apologized. Simpson's mother, Marcella Dabney, said the son she raised would never do something so brutal, without being provoked somehow. "My son is good. He's always been a good kid. Nobody has had a bad thing to say about him." David Wells, the victim's father, said, "I couldn't believe that a human could do that to someone else." ([WTVR](#), [WRIC](#) 2015, and Colin Flaherty before YouTube took down his channel). ALSO: Man charged with murder of Hopewell cab driver played football at Thomas Jefferson ([WTVR](#), [Hudl](#)).
12. **TEACHER SEX WITH STUDENT! Greenville, SC, murder, 2014**, middle school teacher **Laurie Patton**, 38, strangled and set on fire by her former student **Darrin Terrell Eskew**, 21. ([WYFF4](#) 2014)... Schizophrenic Greenville man sentenced in teacher's death: He said he strangled her as she screamed for help and then set her on fire because she wouldn't die, the Solicitor's Office said ([Greenville News](#) 2016). "Through the course of the investigation, investigators learned that Eskew and Patton were

acquaintances due to her being his school teacher in the past,” Greenville County Deputy Drew Pinciario said. “On the day of the incident, Eskew and Patton got into a physical altercation. We don’t know what caused the altercation,” he said. Patton, 39, of Travelers Rest, was a special education teacher who taught emotionally handicapped students, according to Greenville County Schools. Coroner Parks Evans has said her body was burned beyond recognition in the fire at Quality Inn on South Pleasantburg Drive before dawn Monday. ([Greenville News](#) 2014).

- a. **Laurie Patton told Darrin Terrell Eskew she loved him as he choked her at a Greenville County motel** ([WLTJ](#) 2016). Eskew and Patton were in a relationship, although she was married with children, the Solicitor’s Office said. Guests later reported hearing an argument between a male and female about 12:30 a.m. and loud bangs coming from her room between 5:15 a.m. and 5:30 a.m. A security guard went to inquire about the noise and saw Eskew leaving. Eskew told an investigator he knocked a smoke alarm off the wall in the room, wrapped Patton’s head and feet in a sheet, and set the sheet on fire, Assistant Solicitor Allen Fretwell said. Investigators found Patton’s “badly charred,” body after the fire was put out. Eskew left the motel in Patton’s SUV and went to a grocery store on Woodruff Road to get something to eat, Fretwell said. Eskew also went to Patton’s house to look for money, but noticed her family was there. He then headed to Atlanta and was found in Banks County, Georgia, driving her SUV in an erratic manor. Eskew admitted to becoming extremely angry with Patton while in her room. “She was a 103-pound ball of energy, acceptance, dependability, love, comfort, worry, humor and consistency,” her sister, Mandy Evans, said in a prepared statement she read to the court.

13. **WHITE MAN FOUND SHOT IN BURNING SUV: Orangeburg County, SC, murder, Sept. 2013**, Richard Michael “Mike” Carter, 61, shot to death and burned inside an SUV by two brothers 23 and 25. Mr. Carter went to collect rental income and never returned home; two brothers who were renters were captured and arrested for his death ([FindAGrave](#)). ([WISTV](#) Sep 2013) Bond denied for man accused of killing area businessman ([WISTV](#) Dec 2013). Harrison Bell, apparently a prosecutor, said the incident may have started out as a robbery, but it “wound up with murder.”

- a. UPDATE: ([The Times and Democrat](#), Sept. 2015) “Brothers: 1 guilty, 1 not; eldest Glover sentenced to life in prison.” The younger Jason Glover was found “not guilty,” even though he admitted to helping take the body after the older brother, Leroy Glover, Jr., allegedly admitted shooting the “white man” who was “the landlord.” Asked why he helped, he said, “That’s my brother. I love him.” Jason also said he poured gasoline on the car, and almost caught fire himself. In a prior interview, Jason claimed he acted alone — but later testified that nearly everything he said in that videotaped interview was fabricated by his brother. While in jail, Jason was charged with two counts of “throwing of bodily fluids on a state corrections or local law enforcement officer.” (Doesn’t that make him an accomplice?)

14. **HOME ROBBERY-MURDER: Omaha, NE, murder / robbery, Feb. 2013**, Raymond & Elizabeth Vasholz, ages 83 and 76, burned by Terrance Hale, 30, whom they’d

previously paid to shovel snow. He said, 'Your house is on fire! Give me money!' then attacked the wife.
