Pre-Physical Therapy & Kinesiology/Double Minor in Creative Writing and Business

Extracurricular activities, organizations, groups, clubs, interests, passions, etc.

Student Athletic Training, YoungLife

What do you want to have accomplished in 5 years?

Looking forward, I would have graduated with my Bachelors of Science from Jackson State University and have been inducted into the Student Hall of Fame. I would be enrolling in grad school at Louisiana State University to pursue my Masters. Hoping to be able to continue my annual internship with the Rams or the Cowboys.

In what business/professional area do you want to improve the most? What skills do you hope to attain?

The need to increase my own social status in a positive way is detrimental. The world needs more productive African American female representation in media and on all digital platforms. If we are to be oozing anything into the minds of the next generation, it should be something beneficial long term and yielding lasting results. I want to learn how to speak professional jargon among all career aspects and not restrict myself to just one area of expertise. I want to be able to grow beyond the common lifestyle society wants to limit me to.

What most excites you about the possibility of partnering with us?

This given opportunity as well as the possible networking it comes with is all around inspiring. As a college student it is imperative for me to make these important connections as soon as I can. The bonds of those connections can take me farther than anything possible because great achievements are made by great people.

Any special requests or concerns?

Thank you for the opportunity that could've easily given to someone else. To know that I earned a spot to blossom with this bound to flourish company is amazing to even fathom. Thank you again for considering me!
