

## StarRocks Global Summit Community Reel 🧑 Win a \$100 Gift Card!

Hey everyone — we're putting together a short community reel to showcase at the **first-ever StarRocks Global Summit!** This will be made up of quick **10–30 second clips** from YOU — the community members — sharing why you **use, love, or contribute to** StarRocks.

**If we use your submission in the reel, you win a \$100 Amazon gift card!**

👉 We'll also use some of the clips as teasers in Slack leading up to the event, so **it's a great way to highlight your voice in the community** and showcase yourself for future **speaker opportunities**.

### 💡 Choose a Prompt—Or Share Your Own

#### How to submit:

- Upload your video to the Google Drive folder → [\[Upload HERE\]](#).
- Fill out this short form → [\[Form Link\]](#). We'll confirm receipt and let you know if you're featured (and how to claim your prize).

Here are a few ideas to get you started. Choose one (or more!), or share your own, then record a short video on your phone or laptop. We'll stitch them together for the Summit reel.

- What's the single biggest reason you use StarRocks?
- How has StarRocks improved the speed or performance of your analytics?
- What's one thing StarRocks lets you do that you couldn't do before?
- Why do you love being part of the StarRocks open source community?
- What's your favorite StarRocks feature — and why?
- What problem did StarRocks solve for your team?
- In one sentence, how would you describe StarRocks to a friend or colleague?
- What surprised you most when you first tried StarRocks?
- How does StarRocks make your day-to-day work easier?
- What's the most impressive result you've achieved with StarRocks?
- What makes StarRocks different from other data platforms you've used?
- Why did you choose StarRocks over another solution?
- If you had to describe StarRocks in three words, what would they be and why?
- What excites you most about the future of StarRocks?

### 🎤 Recording Tips:

- Keep it casual — like you're talking to a colleague!

- 10–30 seconds is perfect. If you wish to record a longer video, we may clip & use a shorter part of it.
- **Vertical video (phone style)** works great, but horizontal is fine too.
- Use headphone audio if possible; if not, try to stay close to the microphone for clear, echo-free sound.

We'd love to feature as many members as possible — so jump in, have fun with it, and let's show the world the power of the StarRocks community! 🌟
