

JOB DESCRIPTION:

Job Title: Front End Developer

About Us

PBR Life Sciences offers market data, analytics, and consulting solutions to aid success in life sciences industry. We leverage the power of big data analytics, technology, and people to enable commercial success and improved patient outcomes. (Check us out: <https://pbrinsight.com/>).

Who are we looking for?

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application.

You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

JOB PURPOSE (*why job exists*)

1. To ensure users of our platforms, software, apps, and website can easily interact with the solutions.
2. Responsible for building the 'client-side' of our web applications.
3. To translate our company and customer needs into functional and appealing interactive applications.

KEY RESPONSIBILITIES: (*what it must achieve*)

1. Develop new user-facing features.
2. Build reusable code and libraries for future use.
3. Ensure the technical feasibility of UI/UX designs.
4. Optimize application for maximum speed and scalability.
5. Assure that all user input is validated before submitting to back-end.
6. Collaborate with other team members and stakeholders.

JOB FACTORS

SKILLS & BEHAVIOURS

- Demonstrated ability to show entrepreneurial spirit.
- Self-starter with ability to solve problems with minimal direction/supervision.
- Must be personable and able to work in a team environment.

- Strong interpersonal communication and organization skills.

COMPLEXITY: (degree of change & uncertainty; level of influencing required; degree of matrix working)

1. Ability to work under minimal supervision in achieving business objectives.
2. Ability to identify complex problems and reviewing related information to develop and evaluate options and implement solutions.
3. Persistence and doggedness to follow through on all task and to overcome obstacles.
4. Ability to perform multiple tasks and adjust quickly in short timeframes.

SPECIALISED KNOWLEDGE: (*breadth & depth across disciplines / functions; expertise in field required*)

1. Significant knowledge of front-end frameworks such as Angular, React, HTML/CSS, JavaScript, Node.js, or .NET.
2. Proficient understanding of web markup, including HTML5, CSS3
3. Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
4. Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
5. Good understanding of asynchronous request handling, partial page updates, and AJAX
6. Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is a plus.
7. Proficient understanding of cross-browser compatibility issues and ways to work around them.
8. Prior knowledge of software versioning management tools, such as Git/GitHub/Mercurial/SVN
9. Good understanding of SEO principles and ensuring that application will adhere to them.

QUALIFICATION

- Bachelor's degree in Computer Science (or equivalent experience).
- At least 2+ years of relevant experience as a frontend developer.

How to apply:

Send your CV to **MarketAnalytics@pbrinsight.com** and we will review and get back to you, should your skills and experience fit the requirement for this role.
