Introduction

[11 pt Cambria, Regular] papers should original research contributions. Papers must be submitted electronically via open journal systems and Register In website journal.uad.ac.id/index.php/IJISH or send to e-mail ijish@fai.uad.ac.id. The introduction should contain research questions, literature review, and research method.

Example Of Introduction, Indonesia is a big country which has a tremendous population. At least 250 millions people live in this whole archipelago area. It has a legend title which is very popular. As was sung by Koes Plus, "people said that our land is a paradise land, wooden stick and stone becomes plants." There are others similar compliment, one of them is 'the emerald equator', and so on. It shows how wealth this country is. However, in vise versa, all of us know well about the real condition of society's welfare in Indonesia. There are so many jobless people and job vacancy that can not pervade all of workers. It is very awful.

There are many assumptions that Indonesian society mentality is agrarian, worker, and only can be labour not a leader or activator. That assumption can be right. The fact is that work community level is dominated by the young generation who look for job vacancy, while the job opportunity which provided by the government is not match with the flow of school and university graduates.

Method

Before you begin to format your paper, first write and save the content as a separate text file. Keep your text and graphic files separate until after the text has been formatted and styled. Do not use hard tabs, and limit use of hard returns to only one return at the end of a paragraph. Do not add any kind of pagination anywhere in the paper. Do not number text heads-the template will do that for you.

Finally, complete content and organizational editing before formatting. Please take note of the following items when proofreading spelling and grammar:

Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, sc, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

Units

- Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as “3.5-inch disk drive.”
- Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each quantity that you use in an equation.
- Do not mix complete spellings and abbreviations of units: “Wb/m²” or “webers per square meter,” not “webers/m².” Spell units when they appear in text: “...a few henries,” not “...a few H.”
- Use a zero before decimal points: “0.25,” not “.25.” Use “cm³,” not “cc.” (bullet list)

Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic and insert it into the text after your paper is styled.

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in

$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use “(1),” not “Eq. (1)” or “equation (1),” except at the beginning of a sentence: “Equation (1) is ...”

Some Common Mistakes

- The word “data” is plural, not singular.
- The subscript for the permeability of vacuum μ_0 , and other common scientific constants, is zero with subscript formatting, not a lowercase letter “o.”
- In American English, commas, semi-/colons, periods, question and exclamation marks are located within quotation marks only when a complete thought or name is cited, such as a title or full quotation. When quotation marks are used, instead of a bold or italic typeface, to highlight a word or phrase, punctuation should appear outside of the quotation marks. A parenthetical phrase or statement at the end of a sentence is punctuated outside of the closing parenthesis (like this). (A parenthetical sentence is punctuated within the parentheses.)
- A graph within a graph is an “inset,” not an “insert.” The word alternatively is preferred to the word “alternately” (unless you really mean something that alternates).
- Do not use the word “essentially” to mean “approximately” or “effectively.”

- In your paper title, if the words “that uses” can accurately replace the word using, capitalize the “u”; if not, keep using lower-cased.
- Be aware of the different meanings of the homophones “affect” and “effect,” “complement” and “compliment,” “discreet” and “discrete,” “principal” and “principle.”
- Do not confuse “imply” and “infer.”
- The prefix “non” is not a word; it should be joined to the word it modifies, usually without a hyphen.
- There is no period after the “et” in the Latin abbreviation “et al.”
- The abbreviation “i.e.” means “that is,” and the abbreviation “e.g.” means “for example.”
- An excellent style manual for science writers is [1].

Results and Discussion

[11 pt. Cambria, Bold] Chapter of Discussion in Paper

[11 pt Cambria, Regular, with spacing 1,5] Paper length is limited to 20 pages (including all figures, tables, bibliography and appendices). Authors should follow the format found in the *IJISH Template*. Papers should be in pages with a font size of 11 points using Cambria type for text, title, author information, and main section headings. Papers should be formatted for A4 paper. Top, bottom, and side left and Right margins should be 3 cm. followed by details of the methods, materials, procedures, and equipment used. Findings, discussion and conclusions should follow in that order. Appendices may be employed where appropriate. The APA Publication Manual should be consulted for details as needed.

[11 pt. Cambria Bold] Chapter of Discussion in Paper

[11 pt Cambria, Regular, with spacing 1,5] example: Every country has a means of communication that can fluent a relation between persons. This means of communication is called language. English is a very important language in this world. It is the international language that has been used by most of countries in this world mentions five factors that have made English an international language [2]:

- Its internal linguistic features.
- The large number of English speakers.
- The wide geographical spread of where it is used.

[11pt. Cambria] Figures and Tables

Positioning Figures and Tables: Place figures and tables at the top and bottom of columns. Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Fig. 1,” even at the beginning of a sentence.

We suggest that you use a text box to insert a graphic (which is ideally a 300 dpi resolution TIFF or EPS file with all fonts embedded) because this method is somewhat more stable than directly inserting a picture.

To have non-visible rules on your frame, use the MSWord “Format” pull-down menu, select Text Box > Colors and Lines to choose No Fill and No Line.

Figure Labels: Use 10 point Times New Roman for Figure labels. Use words rather than symbols or abbreviations when writing Figure axis labels to avoid confusing the reader. As an example, write the quantity "Magnetization," or "Magnetization, M," not just "M." If including units in the label, present them within parentheses. Do not label axes only with units. In the example, write "Magnetization (A/m)" or "Magnetization (A (m(1)," not just "A/m." Do not label axes with a ratio of quantities and units. For example, write "Temperature (K)," not "Temperature/K."

Conclusion [11 pt. Cambria Bold]

[11 pt Cambria, Regular, with spacing 1, 5 in 1-2 paragraph] example : Social welfare, especially in Indonesia always becomes an interesting topic to be discussed. It can be separated with the education. One of subject that has been taught in every level of education in Indonesia is English. It has an important role in increasing the social welfare in Indonesia. By having a good mastery in English, people will have more opportunity to get a better job than others. In consequence, it will improve their income and get an improvement in their social welfare.

Acknowledgment

The preferred spelling of the word "acknowledgment" in America is without an "e" after the "g." Avoid the stilted expression "one of us (R. B. G.) thanks ...". Instead, try "R. B. G. thanks...". Put sponsor acknowledgments in the unnumbered footnote on the first page.

References [11 pt CAMBRIA, All CAPS, CENTRE]

[11 pt. Cambria, 1 spacing] The main references are international journals, proceedings, and books. All references should be to the most pertinent and up-to-date sources. References are written in **IEEE Style**. Please use a consistent format for references – see examples below :
