## Making Digital Learning Accessible & Engaging

### *A Professional Learning Experience*

In this course, participants will develop an understanding of the learner factors that impact engagement and how UDL guidelines can inform strategies to support learning in a digital context. We'll explore resources and examine different examples of practice from leading educators across the country.

Each learner has a unique constellation of strengths and challenges that impact their learning. These strengths and challenges can vary depending on context. Our Learner Variability model consists of factors and strategies steeped in learning sciences research and across a whole child framework. Connections among factors and across domains can offer valuable insight for educators who are trying to support the complex needs of each learner.

Visit the free [Learner Variability Navigator](#) to explore research-based, whole child frameworks.

## Through this series, educators will:

- Understand the research behind learner factors that impact student engagement.
- Explore the intersection of UDL guidelines in a digital context to make learning more accessible
- Develop an action research project OR complete a micro-credential from the Learner Variability Stack.

## Intended Audience:

- Teachers (K-12)
- Instructional Coaches, Instructional Coordinators, Curriculum Developers
- School Leaders
- Professional Learning Communities

## Professional Learning Series

Workshop Topics
Motivation, Technology & Multiple Means of Engagement Explore the research behind how to engage learners in a digital context and why self advocacy is critical in an online environment.
Multiple Means of Representation in a Digital Context Review different strategies and tools for supporting varied learners.
Accessibility & Multiple Means of Action and Expression Learn about ways educators are supporting multiple means of expression in online environments.

## Select the professional learning outcome you want:

- Complete a [micro-credential](#)
- Develop your own action research plan
- Customize your own workspace to meet your needs
