

How to make CoAF approved Spellpackets By Crystal A

Materials:

- Cotton fabric or natural fiber fabric
- Thread , string , yarn
- Scissors
- Approved birdseed (NO sunflower seeds, corn, or large seeds. Millet, finch seed, smaller non sharp seed)

Goal:

- Safe sized soft packet
- Should be able to fit within eye socket fully

Step One) Cut out a square of cotton or cotton like fabric. Ideally, this should be an **8inch by 8 inch square**, but no smaller than 6 inches by 6 inches.

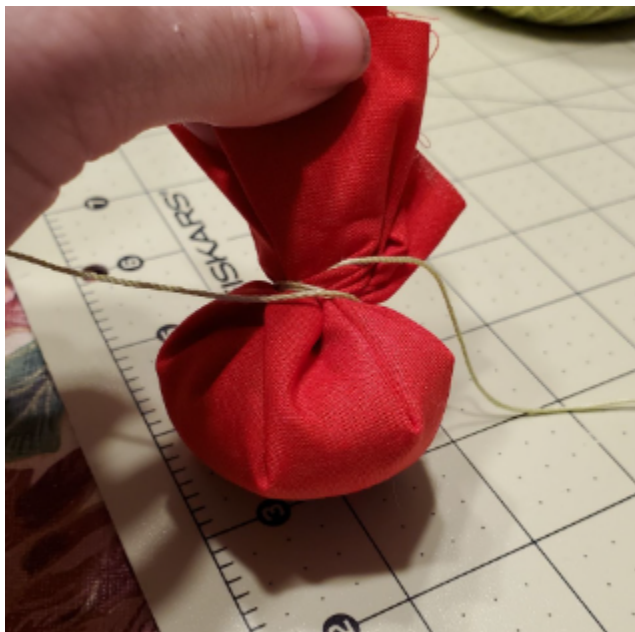

Step Two) Place about 3 large spoonfuls or a shot glass full of birdseed (**WITHOUT sunflower seeds**). It should look about like this:

Step Three) Obtain string. This is crochet thread and works very well. **(No Rubber Bands!!!)**

Step Four) Bring the corners together, and begin to tie by wrapping the string around the packet

Step Five) Finish wrapping and tie off the string. Leave a little room for the seed to move in the packet, and you have a spell packet!
