What Is A Platinum Tracked Out Stem Lease?

Platinum-rap-beat-Lease

This lease is very popular for well established hip hop artist that have a larger budget to spend on much production. The tracked out stem lease allows the artist to download the Wav file stems used in the creation of the rap instrumental.

What Is A Wav File Stem?

These are the individual files used in the creation of the instrumental. This consists of the Drums, Kick, Snare, Hats, Percs, samples, sfx , synths and instruments used to make the beat. Wav is an uncompressed audio file.

What Are The Benefits Of A Tracked Out Lease?

Most professional hip hop artists like to have more control over the creation process. This tracked out stems allow the artist to manipulate the instrumental to with accordance the specifics of the songs that are written over the instrumental.

It also gives the artist's producer or mix engineer more control in the mixing and mastering process of the final recording. By giving the mixing engineer more freedom with the individual stems the music producer can produce a much cleaner higher quality recording for the artist.
