

List of international volunteers and organizations who help Ukraine

(this document will be updated as we find more information)

For volunteers and organizations in other countries who are collecting supplies to deliver to Ukraine

This official website <https://www.helpukraine.center/> contains the information about what supplies are needed the most, the address of the drop-off center, and instructions for how to pack medical supplies. They are currently experiencing some connection errors since they are changing the platform – try back shortly if it doesn't connect.

If you are willing to collect critical supplies locally, please consider finding and cooperating with other volunteers in your country. A lot of individuals and volunteering organizations are self-organizing around the world right now to collect the necessary supplies for Ukraine and deliver them to the drop-off logistics center in Poland. You may be able to help each other to buy in bulk prices and do fewer trips to the drop-off point.

Resources for people are willing to donate or volunteer to help by country

Poland

- (...pending...)

Germany

- A group of volunteers in Germany who collect and deliver the critical supplies to the drop-off center in Poland:
