Welcome! This document is meant to record the events that follow in the Enderhaven SMP, and also help those who are behind on the lore! This is a document that has documented the important lore in chronological order since the very beginning of the server.

*(Also, **please don't request access to this document**! It floods my email. Unless you have a quick question regarding credit, using this for projects, or anything else, then that's fine*

ADDED SOON

***Another note**: sorry if the images are cut off, it just happens when the document gets longer. When more stuff is added it'll show the full picture again.*

The Beginning

People in it: FlynnSteel, Harry, Lucid, Zolx

In the spring in March of 2024. **FlynnSteel** with **Harry**, **Lucid** and **Zolx** started a "2 week minecraft phase", Within the first hour, Zolx and Harry died to a spider, causing the Squad to locate to a new island where various locations where made, **Zolx's House, Harry's House, Lucid's House (1 and 2), FlynnSteel's House, The Farm, The Underground Water Thingy and The Mines,** Nothing Much Happened in This Era but there is more in the House Building Section.

House Building

People in it: FlynnSteel, Harry, Lucid, Zolx

Around a day later, The squad build the houses, Lucid's house gets rebuilt, the first one is destroyed, Zolx and Harry's houses are right next to each other, things are going peaceful still and thats at least what happens til **The Overhaul, The Mines** would be the only location not built til **The Overhaul**, but it was discovered at some point during **House Building**, There is now no diamonds in the cave anymore, There was also a taxing system around this time, You would get 2 diamonds, 50% goes to Harry or Umar, This was eventually broken at one point.

FlynnSteel's Base from far distance.

The Overhaul

People in it: FlynnSteel, Harry, Lucid, Zolx, Georgie

The SMP continues smoothly until **The Overhaul**, But with a new addition being Georgie joins the server, making there 5 members, Few conflicts with **Georgie** and **Lucid** start, everything is still going okay, This is probably the longest era of Enderhaven 1.0, mainly due to the **Marlowe vs Harry War** happening the day **The End** starts, This is also around the time **The Mines** get created, being a much easier access to **The Cave**, built near **Harry's House**, Also around this time, a few conflicts also begin with **Harry** and **Lucid** but this still goes smoothly, even one time they both looked together for diamonds and found The Spawn Point, **Georgie** does leave the SMP at one point, going back to four members, then **Marlowe** joins and makes one mistake that would ruin everything.

Marlowe vs Harry War

People in it: FlynnSteel, Harry, Lucid, Zolx, Marlowe

Around the day **The End** starts, **Marlowe** accidentally blows a creeper up near **Harry's House**, causing the first War of the SMP to happen

Parties

Harry	Marlowe
• Lucid • FlynnSteel • Zolx	

Harry does end up winning the war after **FlynnSteel** trapping **Marlowe** in a Box, this then goes into **The End**

The End

People in it: FlynnSteel, Harry, Lucid, Zolx

After conflicts end, Lucid, Zolx, FlynnSteel and Harry all go to The End and Kill the Ender Dragon, After the Ender Dragon is defeated, Lucid breaks the bed by accident, Flynn & Zolx all get Elytras.

The Beacon

People in it: FlynnSteel, Harry, Lucid, Zolx

Everyone then starts finding a beacon, and the world abruptly ends...

Before Enderhaven 2.0

After Enderhaven 1.0 Ends, The Squad continue playing Fortnite, Lucid, in around July 2024 leaves Fortnite and takes his hiatus which will last 2 or so months, Zolx also quits Fortnite, Harry and FlynnSteel both stay on Fortnite

In October 2024, Lucid comes back to Fortnite for Chapter 2 Remix, alongside Zolx who also came back, Nothing really happens until February 26th 2025...

Beginning II

People in it: Zolx, Lucid, FlynnSteel, Tj_simz

It has been 10 months since the last SMP started, In the Late Winters on February 26th 2025, **Zolx** starts another SMP with **Lucid**, The Duo had then

relocated to an area, a gap having 2 biomes on both sides, And the infamous "**House**" was created by **Zolx** and **Lucid**, A Day Later, Two newcomers, **Tj_simz** and **FlynnSteel** came to join the SMP, and Everyone parts ways from the House, **Lucid** having An Orange Building, **Zolx** creating a mansion with **FlynnSteel** living in it, and **Tj_simz**... having a dirt hut. Lets Focus more on the Mansion.

The Mansion

People in it: Zolx, Lucid, FlynnSteel, Tj_simz

A few days into the server, **Zolx** has an idea to create a Massive Mansion, This mansion had took over a few hours to finish, but he took it the bigger step by building The City, a MASSIVE chunk of The World, **Tj_simz** also rebuilt his base around this time, and The Bridge got finished too, with a Newsboard, a Minecart and A Map. Things were peaceful... until

Haribo vs The World

People in it: Zolx, Lucid, Tj_simz, Pestme1, Haribo

Haribo was the 6th member to join Enderhaven 2.0, following after **Pestme1**, on February 28th 2025, **Zolx** lend him creative mode to do his base and **Haribo** placed TNT all over the place and was about to blow it up, **Zolx** quickly responded with a Ban, being the first and only ban in Enderhaven, just being in 5 minutes.

Harry's Arrival & The Destruction

People in it: Zolx, Lucid, Harry

Harry was the 7th member to join Enderhaven 2.0, Previously being in Enderhaven 1., On March 3rd, **Harry** built **"The Trap"** which was gonna be a trap on tyler, Then **Zolx** has an idea, to place over 200K TNT all over the map, and ignite the TNT, Making there 14 days of hard work all gone over TNT, The explosion happened, Parts of the map where destroyed and the

game had lagged due to all this, causing the game to crash, There was luckily a copy of this so the world got saved

Harry vs Lucid

People in it: Zolx, Lucid, Harry

What looked like **Lucid** was 2nd place in Overall Enderhaven Rankings, **Harry** was on a target to kill **Lucid**, **Lucid** was successful in the War a few times, until they called “truce”, and this wasn't actually a truce, as they would continue fighting until the rest of this worlds length, this overall ended in a draw.

The End II

People in it: Zolx, Lucid, Harry

Unlike last time, with conflicts continuing, **Zolx** and **Lucid** go to **The End,** and defeat the ender dragon, This took ages to find but it was at a village, and on March 27th 2025, they made it to The End. **Lucid** having 3 beds in this and this was one of the final things, There was a dilemma with the Elytras, Umar and Lucid have 2, but 1 more would be between Harry, FlynnSteel, Ty_simz and Pestme1, Harry wins Elytra No. 3 and right afterwards, they chill for a bit... before a new world started, no cheats no nothing

Beginning III

People in it: Zolx, Lucid, Envixity

After The End 2, Zolx then hosted A New Season of Enderhaven, being Enderhaven 2.0, this has the most content out of all the enderhavens, also being the most used Enderhaven, Zolx and Envixity found a trial chamber, this was the first ever house, Lucid is this time the 3rd ever member to join Enderhaven SMP 2.0, There was also a Pillager Outpost nearby, and Pillager Outposts were a big thing for this season

Move In

People in it: Zolx, Lucid

After Beginning 3, **Zolx** moves to make a Pillager Outpost Farm at new coordinates, This farm doesn't work, taking 2 hours all just for nothing, but **Lucid** decides to build a house at that exact location, **House 2** was made, There was 2 floors, with a basement below the first. On the first floor, there was all the useful stuff, Chests, Enchantment Table, Crafting Table, Brewing Stand, Smithing Template, A Furnace and a nether on the eastern side of the House, At 100 Days, There was a building by **Lucid** with the number “100”, this was the same with 200, This building being created around Early April, In The Basement near the Upstairs, there was an unfinished area for the villagers, On the second floor, there was a wall behind an empty space.

Bridge

People in it: Zolx, Lucid, Harry

Zolx & **Lucid** set on a quest, to rebuilt the Pillager Outpost Farm, they go 4000 blocks east to another Pillager Outpost to rebuild, but that didn't work, so they went 4000 more blocks east to an area, near snow, and **Zolx** starts

the Pillager Outpost Farm, On April 6th, **Lucid** makes The Bridge with Zolx finishing it , spanning 8000 blocks from the Pillager Outpost Farm to The House, (image below of the area before the bridge started, April 6th 2025).

The Bridge starts, By April 11th 2025, 1400 blocks are built within 59 minecraft days, By this time, **Harry** would be the 4th member joining Enderhaven 2.0, **Zolx** does a duping method on the same day which would get many more rails

On April 27th 2025, The bridge is nearly done, theres some views of the house, being finished by **Zolx**.

And the bridge finished, on April 27th 2025 at 11:15pm in BST.

During ATB: The Jumping

People in it: Zolx, Lucid, Envixity

On The Day Achieving The Beacon started, Envixity, Zolx and Lucid were all on at once, Zolx has the plan to tell Lucid to jump Envixity and kill him, right behind the portal, Lucid waits the whole night, and when it turned day and right after Zolx and Envixity get out the portal, Lucid strikes, Envixity, using Golden & Iron Armor doesn't react, Envixity gets 1 hit on Lucid, and Envixity dies, Lucid winning the fight, and the first war of Enderhaven 2.0 concludes, Afterwards, Zolx does more duping, and this leads into ATB.

Documented: jumping someone (ft. ZolxOnMC, Envixity)

Achieving The Beacon

People in it: Zolx, Lucid, Tj_simz

It's the same day, Zolx, Lucid & Tj_simz, the 5th member, Travel to the nether, Lucid gets Netherite Armor before this quest, The Trio find a nether fortress, finding wither skeleton to kill. Tj leaves the mission, and Zolx and Lucid continue the next day, On May 3rd 2025, Zolx and Lucid continue to the fortress, they hang around there for a bit... and this is until they realized Wither Skeletons weren't spawning, They went to another nether fortress and this took a while, taking 700 blocks just to get there, The wither skeletons were finally there, This taking 5 WHOLE HOURS to get 3 skeletons... then Lucid dies to a blaze 💀, The duo decide to go back home, and get ready to kill the wither, once and for all

They go back home, and they gear up before fighting the wither, as Lucid died to the blaze, Then The Duo go to sleep and they spawn the wither, for The Last Dance, They enter phase 2 of the wither and get him down, Lucid drowns, and Zolx get combos, The Wither dies, and the duo finally get the beacon

Documented: Achieving a beacon on the Enderhaven SMP

The End III

People in it: Zolx, Lucid

The next goal after ATB was to Defeat The Ender Dragon, Lucid and Umar go to The End, The Duo defeat the Ender Dragon, And they go to the end cities, they get the Elytras, and then they chill for a bit. Lucid traps a chicken for some reason, Zolx digs some Villagers in a hole, and things go smoothly, but the people at Enderhaven make a decision.
Documented: Chill Time (Enderhaven SMP #10)

Relocation

People in it: Zolx, Lucid, FlynnSteel

Every member splits up and find their own houses, Meaning that House 2 is now abandoned for good. It is unknown where FlynnSteel and Zolx went, But Lucids location got leaked and this leads to the next part, Lucid builds a big circle, but something bad happens
Documented: Relocation (Enderhaven SMP #13)

The Blow Up

People in it: Zolx, Lucid, FlynnSteel, Feranmi

Lucid gets a message by Zolx on May 5th 2025, and it reads “you need to join quick for a bit and hide Feranmi is very close to your base and hes gonna trap it with tnt”, FlynnSteel and Zolx try to stop Feranmi, but its too late,

Feranmi blows up Lucid's base, Lucid survives the Lava, and relocates to somewhere else... which was unknown, as on May 9th 2025, Zolx announces that the world is gone, no more backups, no nothing. 2 months gone in a matter of seconds.

The Beginning III.5

People in it: Zolx, Lucid

Zolx starts a brand new world, with the name "LifeTaker", Similar concept to LifeSteal but with the Enderhaven members, Lucid runs from Zolx, but Zolx gets Lucid to 7 hearts, Zolx being on 13 hearts, and on Day 2, Zolx gets netherite, builds a massive portal and goes to The End, 214 days played, and the world ends, with Lucid on 5 hearts.

The Beginning 4

People in it: Zolx, Lucid

Zolx begins a brand new world, after 5 months of no 2 week phase, The Duo start, with making a Cherry Starter House, During this house build, The Duo look for a mace, The first trial chamber had many skeletons, cave spiders and a windburst, after all of this. The Duo STILL didn't get a mace, after it finished, Zolx had died a few times... After making this house, This house gets an extension with the storage room,...until it gets blown up by a creeper.

Achieving The Mace

People in it: Zolx, Lucid, Fernami (partially)

After Beginning 4, Zolx and Lucid head off to the Trial Chambers, They go through the first Trial Chamber, After they go out they don't get the mace, so they continue into a second Trial Chamber, and after some hard luck. They get the Mace with Unbreaking. After this, Zolx makes a Villager Breeding Farm.

Achieving The Beacon II

People in it: Zolx, Lucid

After The Duo get the mace, They hit the nether trying to get three nether skulls, Instead of taking 5 hours, this took much shorter with them just taking about half an hour before finally getting the Third skull, They fight the wither but all of Zolx's stuff explodes, and they both die, but they get their stuff back later on.

The End IV

People in it: Zolx, Lucid

The Duo head to the end to kill the ender dragon, and in just a couple mace hits, The dragon dies. Zolx gets the elytras and they go home, After a while, Zolx gets 5 elytras for Lucid.

Many More Places

People in it: Zolx, Lucid, FlynnSteel

After this, They head to kill the Ender Dragon for a second time, but this fails, but they build many farms including a Mob Farm, Sugar Cane Farm, Nether Wart Farm, Stone Farm, Iron Farm and more, But after this the world gets deleted and gets backed up until the 5 elytras were they rekilled the ender dragon, After this, Zolx makes a new house, Zolx makes many more builds including a Statue, Music Blocks and many more and FlynnSteel joins, being the 4th member to join Enderhaven 4, Zolx and Lucid hunt for Mending and after many long hours they get mending, riptide and many more enchantments. Zolx and Lucid found out that you can get XP from the Gold Farm, so they were cooking with mending, They could do the same with the Mob Farm but that exploded, but the mob farm got rebuilt.

Mountain

People in it: Zolx, Lucid

It's been a few months since Many More Places and The Duo come back to this world. Not to build more farms but to build a Mountain spanning the entire map. All the materials were big, taking over 3 hours just to get all of the materials. The Duo built a farm on the nether roof for Piglins to spawn in. 1 Layer gets built a day and it gets stopped on layer 5 and then the season ends abruptly.

The Beginning V - The Birth Of A Death

People in it: Zolx, Lucid, Harry, FlynnSteel

It's been a couple months since the last minecraft world with Enderhaven 4 stopping around April 2026, After that theres now talks starting to begin about a potential 'Enderhaven Season 5' and after those talks it was conceived it begins on September 21st 2026, And it looks up to a very bright start for this season, Will that start stay consistent or would it burn in a pithole?, With it being a realm instead of it being self-hosted by FlynnSteel or Zolx, But this season will slowly turn into a downward spiral when it slowly goes on and this is a very good start, With Zolx, Lucid and Harry splitting off into 3 different ways with Harry finding Lucid very briefly in a village and Zolx having a very private run in this season. While Harry stayed offline for big periods during this era and Lucid getting diamonds very early on into Day 1 of the world and same with Zolx as he slowly becomes as strong as he was previously, Lucid getting half diamond armor as well with a "plan" for the first 3 days, On day 2, Zolx can start to enchant stuff and also has netherite armor in this realm, Things start very slow in this realm and Lucid is able to get a horse and a small base, and FlynnSteel joins briefly... just to die and leave for the next few days, But he has his smaller grinds, Nothing can go bad as we go into the next era of this

Non-Stop Grind

People in it: Zolx, Lucid, Harry

The grind is on, Zolx gets many stuff including a mace, a

  [redacted]MEANS A SPOILER!

With all that said, lets go and rank every member from Enderhaven

Enderhaven 1.0 - Members

In this season alone, there was 6 members on this server. The Worst member was

6th - Marlowe

Marlowe was the 6th and final member to join Enderhaven 1.0, Joining pretty late, during the end of The Overhaul, At this time, The End was just being unlocked, So he didn't have much time to gather gear, He was in a war with Harry and had lost the war, Trapped inside of a bedrock box by FlynnSteel, He had golden armor and that was it, Overall, he is the worst member of Enderhaven 1.0.

Prime Era: The Overhaul
Worst Era: Harry vs Marlowe
Score: 2/10

5th - Georgie

Georgie was the 5th person to join Enderhaven 1.0, Joining at the start of The Overhaul, He started maybe a couple conflicts with Lucid, but he lost most of the time, He was just there, Nothing really interesting happened with him and he left eventually.

Prime Era: The Overhaul
Worst Era: Who knows
Score: 4/10

4th - Lucid

Lucid was apart of the Founding 4, joining in Beginning 1, He was weaker compared to the other members in The Founding 4, He had at the peak Diamond armor, but until The End, he had lost all his armor, and lived on Golden Armor, His house was probably the biggest house but probably the [redacted] house there, He was also quite there but he did go on a couple quests with Harry and was perfect allies with most of the people there.

Prime Era: The Overhaul
Worst Era: The Beacon
Score: 7/10

3rd - Harry

Harry was apart of the Founding 4, but unlike Lucid, he was apart of the Big 3 in Enderhaven, He was very good compared to the previous 3, being better than all of them combined, He was one of the first to get diamonds and was on a few quests with Lucid, He even was one of the only 3 to get an elytra, He was still pretty good despite placing on the middle of the wire, He won a war against Marlowe before the end too.

Prime Era: The Overhaul
Worst Era: The Beginning
Score: 10/10

2nd - Umar

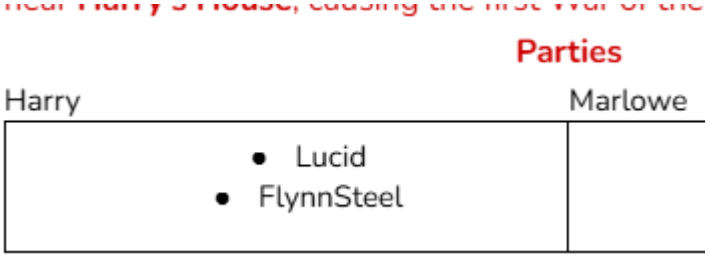

Umar is apart of the Founding 4, Being apart of the Big 3 in Enderhaven, He was the first person to get Full Diamond Armor, had so

many allies, One of the first IF NOT the first to get an elytra, He is not first only because of the base, but if it didn't matter about the base, then he would be first

Prime Era: The End
Worst Era: The Beginning
Score: 10/10

1st - FlynnSteel

FlynnSteel is the creator of Enderhaven 1.0, Apart of the big 3, Second to get Full Diamond Armor, Second to get an elytra, He had a good base, and good farm access nearby, Also being further away then everyone else, Helped alot during the Harry & Marlowe conflict,

Prime Era: House Building

Enderhaven 2.0 - Members

There was 7 members in this server this time, and the worst one is...

Worst Era: Haribo vs The World
Score: 0/10

6th - Pestme1

Pestme1 was the 5th member to join Enderhaven 1.0, Unlike Haribo, Pestme1 ACTUALLY MADE A BASE, But this base was unfinished and they only hopped on the server once, and that was it, They got a couple items like wooden tools but overall wasn't really that good

Prime Era: The Mansion
Worst Era: The Mansion
Score: 1/10

5th - Ty_simz

Ty_simz was the 4th member to join Enderhaven 1.0, He started off with a bad base, a dirt hut, but he rebuilt his house and it turned out quite good, His only BAD thing was his skills, he had no B+ Items

But he was still decent in terms of EVERYTHING else.

Prime Era: The Mansion
Worst Era: Beginning 2
Score: 3/10

4th - FlynnSteel

FlynnSteel was the 3rd member to join Enderhaven 1.0, Being good allies with Harry and Zolx, Had a secret base and was Overall a good member, He was just weaker than the other 3, but was still better then every previous member combined, He did get S Tier items, and was overall still doing good.

Prime Era: The Mansion
Worst Era: The Beginning 2
Score: 8/10

3rd - Lucid

Lucid was apart of the Founding 2 of Enderhaven, Being good allies with Zolx, Living in the Mansion, having good trading plans with Zolx and having good resources, Being the second person to get Netherite, Semi-Built the Bridge, and made this very document, Probably the only problem was due to the conflict but that ended in a draw, but he did get weakened afterwards

Prime Era: Harry's Arrival & The Destruction
Worst Era: The Beginning 2
Score: 9.5/10

2nd - Harry

Harry was the final member to join Enderhaven, Getting netherite around his first day on the server, Before the war, He would be 3rd, but after he would place 2nd, despite the war ending in a draw, He had a good room in The Mansion, and was overall good.

Prime Era: Harry vs Lucid
Worst Era: Harry's Arrival & The Destruction
Score: 10/10

1st - Zolx

Prime Era: The Mansion
Worst Era: The Beginning 2

Tier List Form:

Now, its time to rank every landmark via

1. Power
2. Building in General

Enderhaven 1.0 - Landmarks

In this season alone, there was 8 landmarks on this server. The Worst landmark was...

8th - The Underground Water Thingy

TUWT was made during House Building, unknown on who made it, being placed in between FlynnSteels house and The Farm. This was literally just useless, It was just a ladder going down in a tunnel, Theres no powerness in this and theres nothing else interesting about this. This was never even used.

Score: 1/10

7th - Lucid’s House 1

This was made during House Building, Lucid made this house and this was at the eastern side, near a part of the bridge. This was destroyed after a while as this house sucked.

Heres a screenshot of the house (This was destroyed after the new one was created).
Score: 1/10

6th - The Mines

The mines was discovered early on during House Building, this was made by Lucid to connect easier to the mines, Every diamond got searched here and... theres no point ranking this higher than the rest.

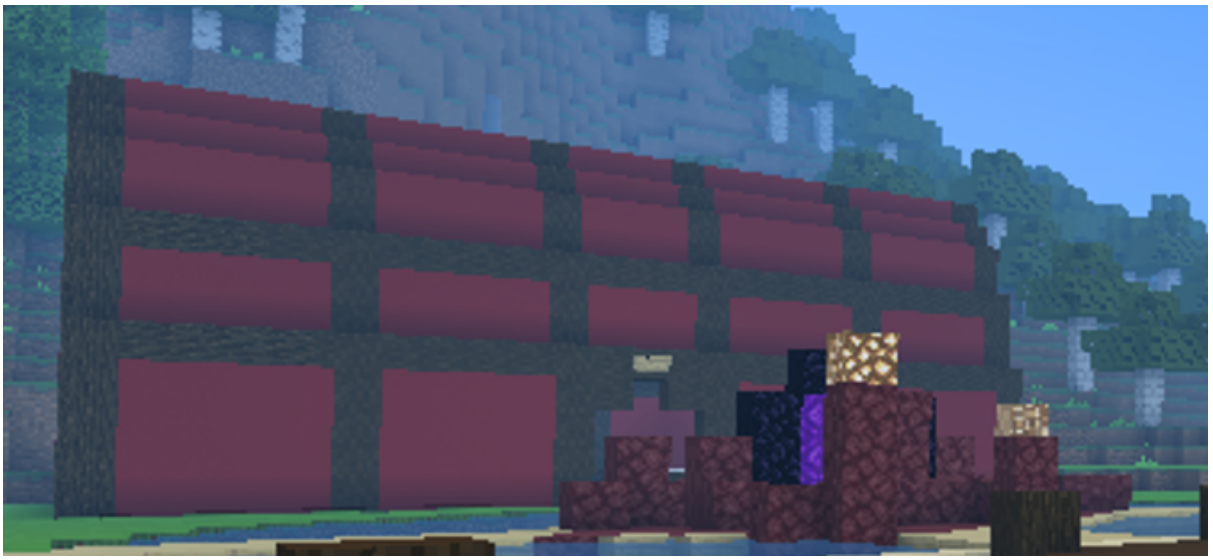

Score: 6/10

5th - The Farm

The Farm was made by FlynnSteel, this had animals (like a normal farm) and thats it, The build was pretty niche and thats really it, pretty good build.

Score: 6/10

Theres a screenshot

4th - Lucid’s House 2

This was made after Lucid’s House 1 during House Building, Zolx helped with this base and this turned out alright, The other 3 houses were WAY better.

Score: 6/10
