# Lab 0.2 - Talking Heads/About Me

1. Locate the picture of yourself that you found last night.
2. Download the picture to your computer
3. Sign in to SNAP!
    a. You will need to sign up for an account if you have not already done so.
4. Click the Costumes tab in the Scripting Area (middle panel)
5. Import or Drag your photo into SNAP Sprite Costume

Coding Requirements:

1. Script starts when you click the
2. Give the Sprite which now has your photo as the costume a specified starting location
3. Your Talking Head Sprite should **_say_** 3 things about yourself:
    - Name
    - Grade
    - an interesting fact about yourself
4. Find a picture of your favorite piece of media of all time (book, video game, movie, song, etc.) from a google image search. After you say the things about yourself in #3, Say what your favorite piece of media is, and then display a picture of this when you are talking about it in the program.
5. Make your sprite move. It should use at least 2 blocks from the motion category.

6. If you finish early do one of these:
    - make the sprite jump when space is pressed (Hint: use a combination of Goto and Glide block)
    - move around the edge of the stage continuously
    - Create another costume for your original sprite so that it makes it look like your mouth is moving.

7. Click the file tab > export project.
    - Your project will download as an xml. Turn this into canvas.
