

Name:

**Chemical & Physical Changes - Digital  
Breakout  
Reflection & Debriefing**

**1. Which of the locks was the most difficult to open? What thinking strategies did you use to attempt to determine the combination to this lock? (Monitor for meaning, inferring, schema, questioning, determining importance, etc.)**

**2. Monitor for meaning. Based on the escape room, what do you realize that you understand well about chemical changes and what is still not understood well?**

**3. What information will be most important for you to remember from this lab?**

**4. List a physical and a chemical change you have recently experienced. Give evidence that supports your belief that the changes were physical or chemical.**
