Get Started

1. So that I can keep all the info in one place, please answer this [Google Form](#), or e-mail me.
2. I will review your order, and will let you know ASAP or at the specified time if I can accept the piece or not, and give you a price for your commission.
3. If you agree to the price, I will send you an invoice which must be paid in full before I start working. If you want to spread the payment out, you can put 50% of the total price down to have up to the sketch drawn, and the rest of the work will be finished once the remaining 50% goes through!
4. Once the invoice is paid in full, I will begin work on the commission, and will send you a sketch as soon as possible so we can begin working on the direction of the piece!

Note:

Please be aware that I try to prioritize commissions on a first come first serve basis, but I do work on all the commissions in my slots simultaneously depending on what my creativity is feeling that day. I get sketches done as soon as I am able, but it may take up to a week or more for me to get it to you depending on my workload!

My goal is to create a picture for you that you are 100% satisfied with! I will do my best to complete it in a timely manner, but please understand that I am trying to make *art* for you, and not just trying to pump out a low quality piece for the sake of being quick.

If you *need* the commission done by a certain date, please let me know! It may incur additional charges depending on my workload! Otherwise I greatly appreciate your patience!
