 - Thank you chat!
 - Review
 - Two reviews today!
 - I borrowed my sisters iPhone so I could give this review... that's how much I love this podcast. Love, Kid_Kurty
 - I switch from NVC to your podcast. You are short and right to the point on switch news. These games like Skyrim and Doom i never played. I am more of a sports game person. With my birthday coming up Fifa and Nba are a must. But for the holiday season not sure what game I would get and your show keeps me changing my mind.
 - Your show continues be entertaining and enjoyable keep up the good work. Also thanks for referring Nintendo power also enjoyable show. One last thing as someone who buys both physical and digital games what do thinks of Nintendo trying to influence digital based on sales they have on major third party games like FIFA and LA Noir.
 - I kind of wish arms would go on sale. Been listening to your show awhile just curious based on number of game it seems like you have did u fill ur sd card yet. This the second reviewing your show it's that good and want to help you get back to a 5.0.
 - Thanks John

- Hey Bill
- I appreciate the time and effort that you put into your podcast, I am also a parent of two very young kids so I understand that free time now days is almost impossible thank you for putting out a quality show. I wanted to ask your opinion about Capcom? I have recently have been playing Slain back from Hell on my switch (handheld mode) so my kids can't see and parental locked, while this game might be difficult for a lot of people this is the closet game that we have on the switch that is in my opinion resembles Castlevania Symphony of the night one of my favorite games of all time, now that Capcom seems to be onboard to bring more titles to the Nintendo platform will this game ever come to the switch? or a remastered version or a sequel these Metroidvania type of games are amazing in handheld mode I would also recommend to anyone who enjoys playing games like that to pick up Slain on the Eshop you will die a lot but if you stick with it and learn the mechanics it's a solid title also with some kick ass music.
- Thanks again Bill.
