

****Privacy Policy — Link Summarizer AI****

****Effective date:** April 28, 2026**

Link Summarizer AI is designed to summarize links directly in the browser with Chrome built-in AI.

We do not collect, sell, or share personal data.

1) Data Collection

We do ****not**** collect personal information on our servers.

We do ****not**** use analytics, ads, tracking pixels, or third-party telemetry.

2) What the extension processes

When you use the extension, it may process:

- The link URL you choose to summarize
- Limited page content fetched from that URL (when available)
- Local extension settings (for example enabled/disabled state and UI preferences)

This processing is used only to generate and display summaries.

3) Where processing happens

Summarization is performed locally in Chrome using built-in AI capabilities (Gemini Nano, when available).

We do not transmit your content to our own servers.

4) Network access

To summarize links, the extension may request the target webpage URL from your browser.

These requests go directly to the destination website, not to us.

5) Storage

The extension uses Chrome storage only for functionality:

- User preferences

- Local model/status state
- Session/local cache for faster repeat summaries

6) Data sharing

We do not sell, rent, or share user data with data brokers or advertisers.

No user data is transferred to our backend services.

7) Data retention

Data is stored locally in your browser and can be removed by uninstalling the extension or clearing extension/browser storage.

8) Children's privacy

This extension is not directed to children under 13, and we do not knowingly collect children's personal data.

9) Changes to this policy

We may update this policy. Any updates will be posted at the same policy URL with a revised effective date.

10) Contact
