

Τεχνικός Εφαρμογών Πληροφορικής

As an **Information Technology Applications Technician**, I have developed skills in installing and maintaining computer systems and networks, as well as in developing software applications and creating websites. Through my studies at the **Model Vocational Upper Secondary School of Alexandroupolis**, I gained practical experience in programming, web application design, and database management. I am also trained in providing effective technical support and ensuring the smooth operation of IT infrastructures. These studies have prepared me to work confidently in both the private and public sectors within the field of Information Technology.

Τεχνικός Η/Υ και Δικτύων Η/Υ

The specialty **“Computer and Network Technician”** at the **Model Vocational Upper Secondary School of Alexandroupolis** has equipped me with practical and theoretical skills in the installation, maintenance, and support of computer systems and networks. Through my studies, I have also gained experience in developing simple software applications and websites. I am able to provide technical support, manage and troubleshoot network systems, and assist in the sales and configuration of IT products. My training has enhanced my ability to work responsibly, solve technical problems efficiently, and adapt to new technologies and professional environments.

Υπάλληλος Διοίκησης και Οικονομικών Υπηρεσιών

The specialty **“Administration and Financial Services Employee”** at the **Model Vocational Upper Secondary School of Alexandroupolis** has provided me with strong administrative and financial skills. Through my studies, I have learned how to prepare official documents, manage correspondence, organize meetings, and handle financial records and invoices. I have developed abilities in office organization, teamwork, and communication, as well as familiarity with basic accounting principles and administrative procedures. These competencies enable me to work effectively in various professional environments, such as accounting offices, private companies, banks, and public services.

Υπάλληλος Αποθήκης και Συστημάτων Εφοδιασμού

The specialty **“Warehouse and Supply Chain Systems Employee”** focuses on the organization, coordination, and efficient management of product and information flow within the supply chain. Through my studies, I have learned how to manage warehouse operations, organize procurement, production, and distribution processes, and ensure smooth logistics functions. I am trained to prepare and monitor orders, track inventory levels, and provide effective customer and supplier support. My education has equipped me with practical and organizational skills that allow me to work responsibly and efficiently in logistics, storage, and supply chain management environments.
