PCMT | Product Catalog Management Tool

Summary

PCMT is open source software that allows organizations and countries to tame their health product data and connect all their systems for better supply chains, patient safety, IT operations and organizational trust.

Value Add

Supply chains, health product offerings, IT systems and organizations are increasingly connected and reliant on accurate and enriched product data.

Better health product data is critical to:

- Supply chain efficiency
  - Right product, right time
  - End-to-end visibility
- Patient Safety
  - Genuine and verifiable products
  - Traceable, adverse event monitoring and response
- IT efficiency / sustainability
  - Global Standards Interoperability
  - Integrated w/ logistics and health systems
- Increased Trust
  - Collaboration across the organization/institution and with partners
  - Single source of truth

Collaborative Approach

PCMT supports GS1 standards for identifying products, capturing data from barcodes, and sharing data

PCMT is based on Akeneo, a leading open source Product Information Management PIM platform

PCMT acts as a OpenHIE Product Registry, sharing product data master to enable interoperability

PCMT is recognized as a Digital Public Good and Global Good for Health

Features

Easy data import and export

(CSV, XLSX, FHIR R5, GS1 & GDSN)

Organize by family, characteristic, association, or hierarchy

Classify using your own model, or global systems

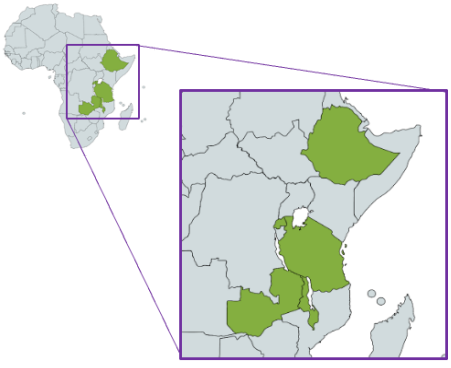

Enrich with custom attributes, media, and groupings

Translate by language and locale

Quality and completeness dashboards

Build consensus with drafts & approvals

Cloud or self-hosted

In use: Ethiopia, Malawi, Rwanda, Tanzania, Zambia, RHSC' GFPVAN
