

Supply Chain Management Certificate

College of Business, Information Technology, and Supply Chain Management

The Supply Chain Management Program prepares students for positions in the Manufacturing, Warehousing, and Transportation industries with courses covering the full range of operations throughout the supply chain from procurement through distribution emphasizing quality management in all processes. In addition to the Ivy Tech credential, students have opportunities to earn multiple industry recognized certifications. Upon completion of this certificate, a student is able to enter supply chain industries in Procurement, Transportation, Operations, or Logistics.
