CHUKWUMA SAMUEL

I am a results-driven Software Developer with +3 years of experience in building applications on the web with the latest JavaScript/Typescript stack and the React ecosystem. I am hungry to develop and advance my web development career.

Technologies and Languages

- Languages: HTML, CSS, JavaScript, Typescript,Python.
- Articles: My articles
- Technologies: Node.js,React.js,Express.js,REST,chakra,TailwindSS, Git, Webpack, JSON, Next.js,Docker.
- Problem-Solving, Teamwork, Communication, Attention to Detail.

Work Experience

Full-stack Engineer   **Thinkshifts**   **June 2024 – Present**
Contract   Remote, United Kingdom

- Designed and built databases for software applications, optimizing data storage and retrieval efficiency.
- Developed and implemented database-backend web APIs, ensuring seamless communication between frontend and backend systems, and integrating secure user authentication and access control mechanisms.
- Collaborated with cross-functional teams to identify and meet application requirements, contributing to software solutions for startups, scale-ups, and established businesses.

Technologies: JavaScript, Node.js, React.js, Redux, CSS, Styled Components, SASS, HTML, REST APIs, GitHub, Storybook, Sanity, Responsive Web Design

Frontend Engineer   **Greatereredo**   **February 2024 – July 2024**
Contract   Remote, Nigeria

- Developed user-friendly fishery management and AI fish detection applications using React.js and Figma designs.
- Conducted A/B testing using Vanilla JS to optimize application performance, user engagement, and accuracy of AI detection algorithms.
- Worked on and consumed GraphQL APIs, developed applications using Next.js, and integrated Paystack payment gateways.
- Created reusable components and delivered a coding course for the marketing team, significantly enhancing their understanding of agritech applications.

Software Developer   **AtelisTech**   **January 2022– December 2023**
                                Remote, Nigeria.

- Developed campaign pages and components in React.js based on UX/UI designs provided in Figma.
- Conducted A/B testing (Vanilla JS) to optimize website conversions, and enhance user-friendliness.
- Created reusable and easily adjustable components, significantly reducing delivery time and eliminating repetitive code across multiple projects.
- Designed and delivered a customized basic coding course for the marketing team, enhancing their effectiveness.

Consultrepreneur   **Diffvelopment**   **June 2022– August 2022**
Strategy Team   Remote, Montclair, United States.

- Developed a prototype showcasing analysis of accounts and transactions for the Diff Client, demonstrating its potential functionality.
- Drove a 30% increase in student engagement by implementing creative marketing campaigns and leveraging social media platforms effectively
- Created strategic plans centered around building generational wealth, considering long-term financial goals and sustainability, and receiving positive feedback for the thoroughness and vision of the plans.

Education and Certifications

- **B.Sc. Mechatronics Engineering,** Federal University of Technology Owerri, Nigeria.(**1st Runner Up-Hack4Futo Hackathon)**
- **Holberton school** Software Engineering with specialization in Backend Development **(march 2022-march 2023)**
- **Nanodegree. Full Stack Development** at Udacity**,**Emeryville,CA United States(Remote)-**2022**

Personal Projects

- **Nestsite:** Node-code website builder for creatives.https://nestsite.vercel.app
- https://nzubechi.vercel.app: My personal portfolio built with Next. For more projects and details, please visit.
