Sir/Madam

I am glad to get the opportunity to write this letter of recommendation for XXXXXXXX in support of his application to pursue a Master's degree in Computer Sciences at your university. He has been my student for two years. I am a professor of X at X University and advisor to him.

He has creative thinking and problem-solving skills and a spirit to take competitiveness positively to always improve himself. He was able to score good grades in his X and X subject. I remember that he received great feedback for his final project which is simulation based performance review of X algorithms between X built-in functions and X algorithm. Moreover, He even participated in X Seoul Regional as a team leader.

Not only in academics, but he is also very proactive in co-scholastic activities and was a software assistant in the X in university for nine months. He participated in the X Hackathon as a team and developed a user-friendly document editor using Java. In his last semester, he got an excellence award of X scholarship for his passionate achievement of extra-scholar activities.

I sincerely feel that he is a deserving student to get admission to Georgia Institute of Technology. It will be the most suitable place for him to polish his existing skills by pursuing a Masters in Computer Sciences. He possesses every quality that is required to achieve his future goals and has the ability to contribute to your institution in various ways. I would like to recommend him to be considered for a seat in the master's course as he is sincerely a deserving candidate.

With regards,
XXXXX XXXXX
