

Refuting Stalin1953

August 29th, 2019

As many now know, a pamphlet circulated by radicals has found way over to our territories, where we must now live in fear of knowing what will happen to our farms under the yoke of a LFI President. I fear not only for my own land, but for the land that many of my fellow brothers and

sisters own in Martinique and Guadeloupe. In order to prevent the spread of misinformation on our territories, I will be circulating my own pamphlet in the hopes that no man or woman will fall victim to the claims that Stalin1953 have made.

I. “Corporate” Farms

It does not surprise me that the LFI have a gross misunderstanding of farming. LFI are attempting to create a class divide between us, the family owned farmer, and the corporate farms which operate on heavy commercial scales. Corporations do not “corrupt” a food supply, no farm does. We farmers are making food for consumption, and if consumers

wish to eat in an unhealthy manner who are we to say no? Corporate farms or small scale farms produce the same goods, just at different scales. This fear mongering tactic should not work on any farmer, as we know that in order to farm “organically” we would lose money, and would rely too heavily on government subsidies - leaving us at the mercy of those in the Assembly.

i. Overregulation of Pesticides and Modified Food

Stalin has made it clear that LFI are against the use of farming pesticides and modified food. As many know, a lot of food is considered “modified” legally. This overregulation would cause us to lose money, have less power over what we grow, and chase the new fad that everything must be

grown from the dirt. I reject this idea, and hope that others follow me in doing so. Us farmers need a President who will back and support our rights, not one who seeks to divide us and overregulate our businesses.

II. The European Union and Market Share

Stalin1953 seems to be against the European Union, claiming that they will fight the EU on agricultural subsidies. We cannot trust Stalin1953 over the European Union, which helps farmers get their goods on the market. It is my belief that LFI and Stalin1953 only pay lip service to the European Union, which protects countries from radical socialism. As a plantation owner who produces sugar for alcoholic beverages, as well as a farmer, I need the European Union to help me get my goods to a wider market. I worry that our businesses will be crushed if we leave the EU, or even if we have people who wish to destroy it from the inside.

I. Penalties to Farmers

Stalin1953 would like to impose penalties on those who are not producing “healthy” food. This is obviously going to impact us so harshly, and would be unfair to those who cannot produce regulated healthy crops. Do not be tricked by wording, any farm (big or small) is an “agri-business”, meaning that you may have to pay a fine on your crops if they are considered unhealthy.

Additionally, penalties will be given to those who engage in “deceptive advertising”, once again targeting farmers and agri-workers in disguise of it being only for big businesses. How many farmers advertise their crops in an area? Many of us - and now we will have to worry about receiving a penalty because it may not be seen as “honest”. This will breed corruption within the system, where the poorest farmers are exploited and fined while those who are friends with the Government receive no penalties! It cannot be regulated!

III. Breeding Government Reliance

It is no surprise that LFI wants to make it so that farmers are tied to the hip with the central government. This will make it so farmers will be at the mercy of LFI and their representatives. We must not allow this to happen! The country does well due to how we give our farmers freedom. Increasing government reliance through subsidies to make up for the over regulation will only hurt us in the long term.

Conclusion

In conclusion, we cannot trust LFI on matters relating to agriculture and farming. A vote for Abrokenhero is a vote to protect farmers and small businesses, as well as ensuring our continued protection within the EU marketspace. Supporting LFI in the Presidential Election will hand too much power to a radical socialist, who will make sure to see our farmland taken away, us receive heavy penalties, and be forced to go to the Government for handouts constantly. Vote En Marche!
