Cardinal Sustainability Summit 2023

Call for engagement

Are you learning about the environment or sustainability? Taking part in projects for the environment? Teaching a class or module related to sustainability? Doing research or implementing policy related to sustainability?

Would you like to share this work with others?

Join us in the Cardinal Lounge, Angell College Center, from 2 to 7 p.m., Friday, April 21, 2023, for the college's first Cardinal Sustainability Summit: "What's Sustainable at SUNY Plattsburgh?" funded by the Green Grants Program.

Our hope is to provide a platform to share the work that is happening in the field and to help inspire opportunities with other engaged community members. Sessions will include screen presentations, poster presentations, roundtable discussions and informal exchanges. Refreshments will be served.

For more information and registration details please visit the following link: https://forms.gle/nGVN6yh3bscwkMTs5.

For more information, contact: Rich Gottschall gottscrl@plattsburgh.edu, Curt Gervich cgerv001@plattsburgh.edu, Michelle Ouellette ouel8653@plattsburgh.edu, or Vlad Perry vperr006@plattsburgh.edu

Tentative Agenda

- Opening remarks - 2-2:05 p.m.

- Discussions and food - 6-7:30 p.m.

Cardinal Sustainability Summit 2023

What's Sustainable at SUNY Plattsburgh?

April 21, 2023, 2 to 7 p.m., Cardinal Lounge, Angell College Center

The 2023 Cardinal Sustainability Summit is funded by the SUNY Plattsburgh Green Grants Program. This pilot project is being led by Rich Gottschall, Curt Gervich, Jeff Gautheir, Vlad Perry and Alyse Frantzen. The organizing committee welcomes any ideas for enhancing the summit and sustainability activities on campus.

Sustainability is an all-encompassing issue, which is being addressed in nearly every program and department on campus. The primary goal of this year's summit is to bring together campus community members who are actively engaged in sustainability projects, learn what people have already done on campus and inspire new work.

Past classes, projects, research, and policy initiatives are welcome because they represent concrete actions taken and ideas that have been tested on our campus. We would like to celebrate the experimental forays into sustainability from across our many campus perspectives and disciplines, in the hopes that this work inspires new initiatives.
