

COMPUTER SCIENCE CAREER PATHWAY CAPSTONE

This Capstone program provides the opportunity for students to extend their skills and knowledge by completing an independent culminating project for the Computer Science Career Pathway. Capstone may take a wide variety of forms that culminate in a final product, presentation, or performance. Students will select a topic, profession, or problem that interests them, conduct research on the subject, develop an action plan, maintain a portfolio, create a final product demonstrating their learning acquisition and/or conclusions, and give an oral presentation on the project to a panel who will collectively evaluate its quality. Students enrolled in this course are required to submit a project proposal by December 1. In order to enroll in Capstone, students must have completed or are working toward 2.5 additional credits in the Computer Science Pathway.
