

The mission of the Parent / Community Volunteer Program is to provide the best education possible for each student in our schools by involving parents and community members in meeting the varying and diverse needs of our students.

Parent / Community volunteer opportunities are available during school hours in grades 6-8. Volunteers assist students -- some who may be struggling, others who need to reinforce skills and still others who need enrichment -- in various ways and in many subjects. We try to match volunteer interests and talents with a variety of positions.
