

# LETTER A + PREFACE

# PREFACE

Formerly titled "The Livery"

This document lists out the status of whether there is currently a livery available in #public-liveries for every aircraft operated by each airline. This should be pretty comprehensive. Check the other document tabs for each letter, though not all might be done as this is a LOT of work.

Green = There is currently a public livery available for this airline with this aircraft.

Orange/yellow if on mobile = There is no public livery available for this airline with this aircraft, but the vehicle has livery capabilities in the livery viewer.

Red/orange if on mobile = The aircraft is either not in game or does not have livery capabilities.

Purple = I (refi) have made a livery for this aircraft that hasn't been released yet.

If there is no photographic proof of the airline operating the aircraft OR there is ZERO difference livery-wise from liveries from other airlines (i.e most DHL subcontracted cargo operators), then the aircraft will NOT be charted down for the airline on this list.

Ultimate goal is for there to be as much green as possible.

Some designations will be inaccurate sometimes but should be consistent with the aircraft itself.

Done for fun and charted down by Refi

**Small note for 707:** the 707-320C in this doc is used to refer to an all-freighter config like the one in game for the 320C. Any other configs for the 707-320 fall under the 707-320B

# oh god what am i doing

This is a list of the air forces of every country including former countries.

**\*\*THE FOLLOWING ARE BEING OMITTED OUT OF THE FORMER COUNTRIES\*\***

- 1933-1945 Germany: self explanatory.
- 1939-1945 Slovakia: client state of said german state
- Vichy France: also a rump state of Germany
- 1918-1945 Finland: Swastika roundel is a big no no
- Italian Social Republic: Nazi rump state
- Independent State of Croatia: Nazi rump state

This list may be amended at any time.
