Abstract

As part of our faculty's ongoing activities, fourth-year students of the Department of Civil & Environmental Engineering conducted an academic field visit for the Highway Engineering course under the supervision of Mr. Rizgar Abdulrahman Omar (the course instructor) on Wednesday, 22/10/2025. The visit was to the project for constructing the dual carriageway and the 40-meter Soran overpass bridge, a road being executed to high quality and standards by Kavin Company. It is noteworthy that this overpass is regarded as the highest in Kurdistan and Iraq. The purpose of the visit was to gain practical insight into highway engineering and the applied aspects of the project. We extend our thanks to the project's engineering staff, especially Engineer Saman Abdulrahman.
