Paper Title

(Centered, Bold, Times New Roman 16, Maximum 14 Words, Each Word Capitalized)

Author-1[1*], Author-2[2], Author-3[3]
(Center, Times New Roman 10, First name Middle name Last name)

[1] Departement Name, University Name (Center, Times New Roman 9)
[2]Departement Name, University Name
[1*]Author1@email.com (correspondence author)

Article History:
Received Jun 12th, 202x
Revised Aug 20th, 202x
Accepted Aug 26th, 202x

Abstrak (Left, Bold, Times New Roman 10)

Abstract is a brief summary of the paper to help readers quickly determine the main research problem, solutions to solving the problems encountered, research objectives and temporary research results which can be in the form of numbers/percentages according to research needs. Abstracts should be clear and informative, providing a statement for the problem under study and its solution. Abstract length between 90 to 230 words. Avoid unusual abbreviations and define all symbols used in the abstract. Using keywords related to the research topic is recommended. (Times New Roman, 10).

Keyword : *Keyword-1, Keyword -2 dst (Maximal 5)*

Abstract

Abstrak merupakan ringkasan singkat dari makalah untuk membantu pembaca cepat memastikan masalah utama penelitian, solusi dari penyelesaian masalah yang ditemui, tujuan penelitian serta hasil sementara penelitian yang bisa berupa angka/persentase sesuai dengan kebutuhan penelitian. Abstrak harus jelas dan informatif, memberikan pernyataan untuk masalah yang diteliti serta solusinya. Panjang abstrak antara 90 hingga 230 kata. Hindari singkatan yang tidak biasa dan definisikan semua simbol yang digunakan dalam abstrak. Menggunakan kata kunci yang terkait dengan topik penelitian direkomendasikan (Times New Roman, 10).

Kata Kunci : Katakunci-1, Katakunci-2 dst (Maksimal 5)

INTRODUCTION

(SUBTITLE Centered, Bold, Times New Roman 12, UPPER CASE)

The article is formatted in a single-column layout on A4-sized paper. The margins are set to 2 cm for the top, left, bottom, and right. The manuscript is prepared using Microsoft Word, with single spacing, 10 pt Times New Roman font, and a length not exceeding 8-12 pages.

The introduction must describe the background of the research, the proposed solution, and comparable related work. If the article includes citations, they MUST follow the format (Author, Year), e.g., (Jinatan, 2023), using the Mendeley citation tool in **APA format**. Foreign terms should be italicized. In the opening paragraph, elaborate on the research problem in a descriptive format. Additionally, explain the expected solution to the problem in your research. Subsequently, provide a review of at least five related studies conducted within the last five years, emphasizing their relevance to your research. This review should highlight the GAP analysis of your study compared to the existing literature. Conclude the introduction by outlining the objectives of your research and the outcomes you aim to achieve.

It is recommended that authors use the following article structure: **INTRODUCTION – METHOD – RESULTS AND DISCUSSION – CONCLUSION**. The article should not exceed 8-12 pages.

METHOD

Research Stages (Subtitle, Times New Roman 10, Left-aligned)

It contains an explanation of the research stages **(MUST BE INCLUDED IN THE ARTICLE)**, which illustrates the sequence of steps in conducting the research, how the methodology is applied in the study, and how the method is tested to obtain results in line with the expected outcomes and research framework. It is preferable to include figures and tables, which must be presented with table and figure names, accompanied by sequential numbering.

Sub Title 2

This Subtitle 2 can also include the problem-solving methods and the stages involved in those methods. In the manuscript, citation numbers should appear sequentially in square brackets [3], and table and figure numbers should follow a consecutive order as shown in Table 1 and Figure 1.

Table 1. Types of Database Management Systems

Name	Number	Field
MySQL	10	100
Oracle	15	200
Access	25	300

(Table title centered, no vertical lines, and the word TABLE should not be written as an IMAGE)

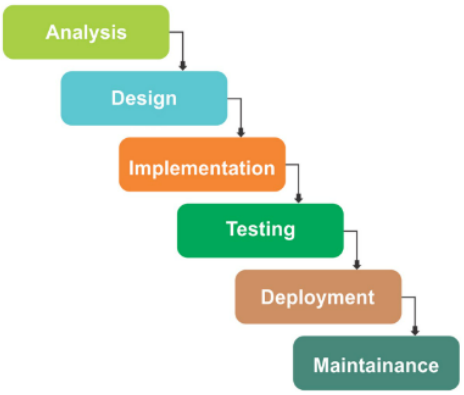

Figure 1. Stages of the Waterfall Method

Use high-quality images and provide explanations for the images used. Formulas should be written using the Equation Editor (EQUATION) available in Microsoft Word. For writing formulas and tables, ensure they are not captured from other sources. Table writing can follow the example in Table 1. The table title should be placed above the table with a centered position (center justified), without bold or colored text. The figure title should be placed below the figure with a centered position (center justified). Formula numbering should be sequential based on the order of formulas in the article, and should be written as (1).

$$\int_0^{\infty} \exp(-\lambda \mid z_j - z_i \mid) \tag{1}$$

$$\int_0^{\infty} \exp(-\lambda \mid z_j - z_i \mid) \lambda^{-1} \; J_1(\lambda r_2) \, J_0(\lambda r_i) \, d\lambda \tag{2}$$

RESULT AND DISCUSSION

This section contains the results and discussion of the research topic, which can be prepared after the research methodology. This part also represents explanations, including descriptions, figures, tables, and others. The word count for this section typically ranges.

CC Attribution-ShareAlike 4.0 License.

Subtitle 1

a. Use lowercase letters and alphabetic numbering for lists.
b. Set a 5 mm left indentation.
c. If there are more than one level of numbering, use numeric numbering for subsequent list items:
    1. Use numeric numbering.
    2. Next.

Subtitle 2

(For list numbering, use a, b, c, and so on.)

Implementation (if applicable)

Contains the results of the implementation of the method, or the outcomes from testing the method.

CONCLUSION

This section contains the conclusion that addresses all the issues identified in the research. The conclusion should not be presented as bullet points but as a paragraph.

ACKNOWLEDGEMENTS

Thanks are extended to those who have supported the successful completion of this research.

REFERENCES

(Justify, Time New Roman, 10)

All references cited in this article MUST be included in the content of the article and MUST use a reference management tool such as Mendeley with the APA format. The literature should consist of 80% PRIMARY sources (journals, proceedings, research reports, patents, standards, historical documents, research books) and 20% SECONDARY sources (books, trustworthy websites) from the past 5 years

The minimum number of references used should be **12 references.**
