

Escape game – Story

At the time when there was still a medieval castle in Hradec, there was a women's monastery. One day, however, the monastery disappeared, and with it all the nuns who inhabited it. People told themselves that the monastery had sunk into the ground, and many would even swear to hear voices from the depths.

One beautiful summer day, a young maid of lady Zuzana, went to the castle to collect some herbs. Suddenly a nun in a white habit appeared to her and said, "Follow me," and she pulled apart the bushes, and an oak door appeared in the chipped wall. The nun unlocked the door with one of the keys and brought the maid through a secret door to the underground chambers with chests full of gold and silver. The nun knew that lady Zuzana was in trouble with money and that she had not been maintained for her old age, so she gave her maid a handful of gold and offered to come again at any time. Lady Zuzana did not forget to pray for the soul of her protector every day until her death.

Therefore, we decided to find this old treasure. Will you help us? First you need to solve 5 tasks. You will find them hidden here in the square in Hradec Králové. Finally, your task is to find the old secret oak wood door and unlock it using a 5-digit code.
