

Privacy Policy — PokerEdge

Last updated: April 1, 2026

ASquareStudios ("we", "us", or "our") operates the PokerEdge mobile application ("the App"). This Privacy Policy explains how we collect, use, and protect your information.

1. Information We Collect

- **Account Information:** When you sign in with Google, we receive your name, email address, and profile photo from your Google account.
- **Session Data:** Poker session details you enter (buy-in, blinds, player count, hands played, stack sizes, and session results) are stored locally on your device and synced to our secure cloud backend for backup and cross-device access.
- **Camera Data:** The App uses your device camera solely for the card-scanning feature. Camera data is processed entirely on-device using an on-device machine learning model. Camera images are never transmitted to our servers, stored remotely, or shared with third parties.
- **Analytics & Crash Data:** We use Firebase Analytics and Firebase Crashlytics to collect anonymous usage statistics and crash reports to improve app stability and performance. This data does not include your poker session details.

2. How We Use Your Information

- To provide and maintain the App's functionality
- To sync your session data across devices
- To improve app performance and fix bugs
- To send important service-related communications

3. Data Storage & Security

Your session data is stored locally on your device using an encrypted SQLite database and synced to Supabase, a secure cloud platform with row-level security policies ensuring only you can access your data. We use industry-standard security measures to protect your information.

4. Third-Party Services

The App uses the following third-party services, each with their own privacy policies:

- Google Sign-In (authentication)
- Supabase (cloud data storage)
- Firebase Analytics & Crashlytics (analytics and crash reporting)

5. Data Sharing

We do not sell, trade, or share your personal data with third parties. Data is only shared with the third-party services listed above as necessary to operate the App.

6. Data Retention & Deletion

Your data is retained as long as you maintain an active account. You may request deletion of your account and all associated data by contacting us at support@asquarestudios.com.

7. Children's Privacy

The App is not intended for use by anyone under the age of 18. We do not knowingly collect personal information from children.

8. Camera Permission

The App requests camera access only for the card-scanning feature. You may deny or revoke this permission at any time through your device settings. Denying camera access only disables the scanning feature — all other App functionality remains available.

9. Changes to This Policy

We may update this Privacy Policy from time to time. We will notify you of any changes by updating the "Last updated" date above and through the App.

10. Contact Us
