¹Affiliation (Department, Faculty/College, Institution/University)
*Corresponding author's email

ABSTRACT

The manuscript should contain an abstract within 200 - 250 words. The manuscript should have a self-contained, citation-free abstract and state briefly the purpose of the research, methodology, key results and major conclusions. Abstract should be in a single paragraph with running sentences. Do not use any subheading or point list within the abstract. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords: 3-5 keywords related to the article, separated by comma.

INTRODUCTION

The introduction section contains the brief idea of work, requirement for this research work, problem statement, and authors contribution towards their research. Sufficient recent reference citation [Bahishti, 2016] from last 10 years should be included for showing the existing challenges and importance of current work. This section should be succinct, with no subheadings unless unavoidable. State the objectives of the work and provide an adequate background related to your work.

LITERATURE REVIEW

Literature review discusses the focus and recent development on the literature, challenges and need of this work in view of those challenges. Avoid a detailed literature survey or a summary of the results.

Author may add a separate related work sub heading

METHOD

This part should contain sufficient detail to reproduce reported data. It can be divided into subsections if several methods are described. Methods already published should be indicated by a reference [Ahmad, 2018], only relevant modifications should be described. Methodology should be written concisely in detail by maintaining continuity of the texts.

RESULT AND DISCUSSION

This section may each be divided by subheadings or may be combined. A combined Results and Discussion section is often appropriate. This should explore the significance of the results of the work, don't repeat them. Avoid extensive citations and discussion of published literature only, instead discuss recent literature for comparing your work to highlight novelty of the work in view of recent development and challenges in the field.

Mathematical Expressions and Symbols

Mathematical expressions and symbols should be inserted using **equation tool** of Microsoft word. References may be added for used equations to support its authenticity, e.g. this result has been analysed using Fourier series [Ahmad, 2018].

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left(a_n \cos \cos \frac{n\pi x}{L} + b_n \sin \sin \frac{n\pi x}{L} \right) \quad (1)$$

Preparation of Figures and Tables

Authors are supposed to embed all figures and tables at appropriate place within manuscript. Figures and tables should neither be submitted in separate files nor add at the end of manuscript. Figures and Tables should be numbered properly with descriptive title. Each Figure/Table must be explained within the text by referring to corresponding figure/table number. Any unexplained or unnumbered Figure/Table may cause rejection of the paper without being reviewed.

Formatting Tables

Table should be prepared using table tool within the Microsoft word and cited consecutively in the text. Every table must have a descriptive title and if numerical measurements are given, the units should be included in the column heading. Formatting requirement has been summarized in the Table 1.

Table 1: Summary of formatting requirement for submitting paper in this journal.

Layout	Size	Margin (Normal)	Header	Footer	
Single column	A4 (8.27" X 11.69")	Top=1" Bottom=1" Left=1" Right=1"	Do not add anything in the header	So not add anything in the footer	
Font	Article Title	Headings	Subheadings	Reference list	Text

	Times New Roman, 14 pt, Bold, centred	Times New Roman, 12 pt, Bold, Left aligned	Times New Roman, 12 pt, Bold, Left aligned	Times New Roman, 11 pt, Justified	Times New Roman, 12 pt, Justified
Line Spacing	1	1.5	1.5	1.15	1.5
Page number	We will format and assign page numbers				

Formatting Figures

All figures should be cited in the paper in a consecutive order, author may be asked to provide separate files of the figure. Figures should be used in bitmap formats (TIFF, GIF, JPEG, etc.) with 300 dpi resolution at least unless the resolution is intentionally set to a lower level for scientific reasons. If a bitmap image has labels, the image and labels should be embedded in separate layer.

CONCLUSIONS

Each manuscript should contain a conclusion section within 250-450 words which may contain the major outcome of the work, highlighting its importance, limitation, relevance, application and recommendation. Conclusion should be written in continuous manner with running sentences which normally includes main outcome of the research work, its application, limitation and recommendation. Do not use any subheading, citation, references to other part of the manuscript, or point list within the conclusion.

Declarations

Provide all possible limitation faced in the study which might significantly affect research outcome, If not applicable write, none.

Acknowledgements

All acknowledgments (if any) should be included in a separate section before the references and may include list of peoples who contributed to the work in the manuscript but not listed in the author list.

Funding source

Provide funding source (if any), supporting grants with grant number. The name of funding agencies should be written in full.

REFERENCES

Author(s) are responsible for ensuring that the information in each reference is complete and accurate. Use APA referencing style. Do not use grey literature (social media, Wikipedia etc) as reference, only scholarly literature (Journal, online books, proceedings, patents, authentic websites with permanent archival policy) are acceptable references. Author should include sufficient recent (last 10 years) references in the article. All references should be cited within the text correctly; do not add only list of references without citation within the text.
