

When to enter

Are there equal lows/highs in the direction you are entering towards?

Are there equal lows/highs in the opposite direction of your trade if so wait for them to be taken out or take the trade with caution

Are the trams aligned exactly for a waterfall or volcano setup?

Is the money flow profile exactly aligned with the trams?

Is there an IFVG near the break of the 20MA?

if all these check enter the trade

<https://youtu.be/Hh1b4esmsAQ?si=1nGkrlilJcAxt5By> Youtube video that helps understand IFVGs
