

Let's map some COVID-19 data and create professional interactive web apps.

Part 1. Massachusetts Data.

You can either map the county-level data or the town/city-level data and create a professional web app to share your mapping with the public.

Part 2. USA Data.

Map the data file available from the CDC and create a professional web app to share your mapping with the public.

Deliverables.

Two web apps - please send me the links as an Email.

- Make sure they are shared as Public.
- Make sure you rename the data layers as needed.
- Configure the pop ups and make them professional.
- Configure the web apps and make them professional.
