

# Linking Videos in Docs and Slides

You can link to a PhotoBooth movie that's in your Drive but you cannot embed it in a Doc (see info on Slides below if you want to do that).

## **To link to a Doc:**

1. Upload your PhotoBooth movie or screencast and change the [share settings](#) to make it viewable by anyone with the link.
2. Copy the URL for the movie file.
3. Open a Doc.
4. Type a line of text (e.g. "Click here to watch a video".)
5. Highlight the text.
6. Click the link icon in the top menu bar. 
7. Paste the URL.

When students click the link, a new window will open with the movie.

## **Alternately, you can embed the actual video on a Google Slide.**

1. Upload your video in Drive and change the share settings to make it viewable by anyone with the link.
2. Open a Slides presentation.
3. Click Insert > Video > Google Drive and navigate to your video.
