

Creating a Canvas Parent Account

1. Your child will first need to generate a pairing code in order for you to observe their account. First, have your child sign in to Canvas (wl.instructure.com). Click on the account icon and then Settings.
2. Now, have your child click the "Pair with Observer" button.
3. A new window will appear with your pairing code. Take note of this as you will need it later.

A screenshot of the 'Yoder Test's Settings' page. The page is divided into several sections:

- Profile Information:** Full Name (Yoder Test), Display Name (Yoder Test), Sortable Name (Test, Yoder), Language (System Default (English (US))), and Time Zone (Eastern Time (US & Canada)).
- Web Services:** A section explaining that Canvas can make life easier by tying itself in with other web tools. It includes a checkbox for 'Let fellow course/group members see which services I've linked to my profile' which is checked.
- Registered Services:** A section titled 'No Registered Services'.
- Other Services:** A section titled 'Click any service below to register:'.
- Ways to Contact:** A section for 'Email Addresses' with one address 'yodertest@student...' and a '+ Email Address' button. Below it is a table for 'Other Contacts' with a '+ Contact Method' button.
- Action Buttons:** On the right side, there are buttons for 'Edit Settings', 'Download Submissions', 'Pair with Observer' (circled in red), and 'Download Course Content'.

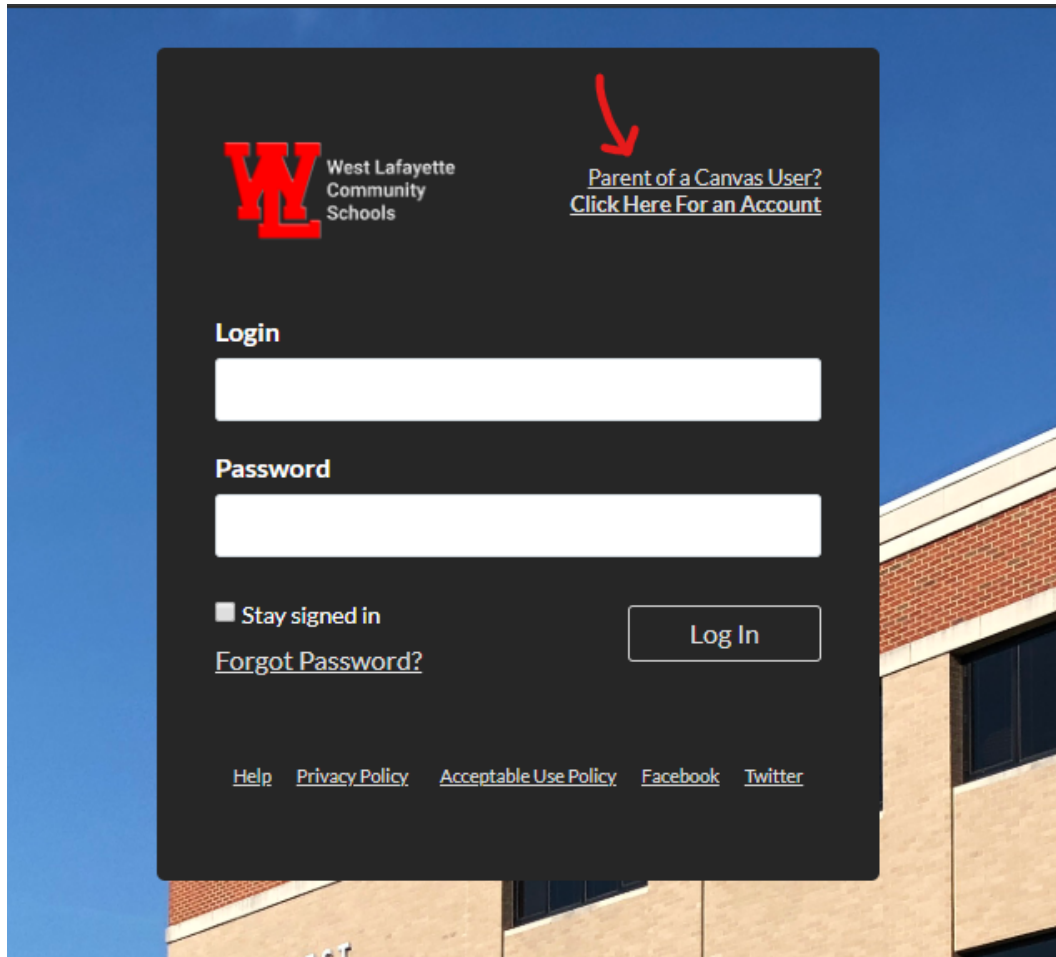

A screenshot of the 'Pair with Observer' dialog box. It contains the following text:

Share the following pairing code with an observer to allow them to connect with you. This code will expire in seven days, or after one use.

 Below the text is a text input field containing a blacked-out pairing code. At the bottom right is a red 'OK' button.

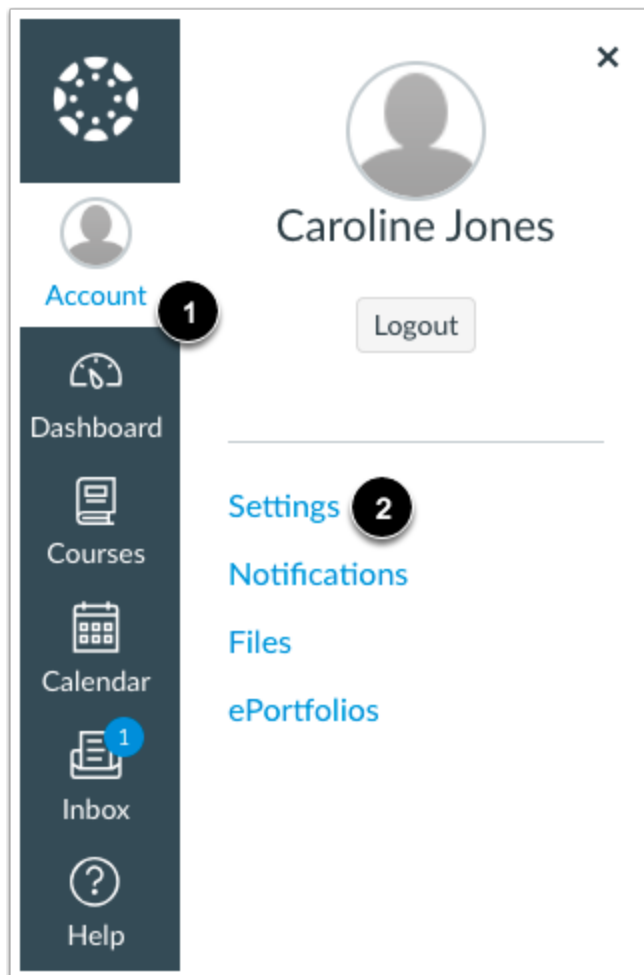

4. Now it's time to create your parent account. Parents need to visit **wl.instructure.com/login/canvas** in order to make an account and log in!
5. We recommend using the Chrome browser for this.
6. Click on the "Parent of a Canvas User?" button. You will be asked to make an account and enter your child's pairing code at the bottom.
7. That's it! You can now login to your Parent account at **wl.instructure.com/login/canvas** or by using the **Canvas Parent app** available on your phone's app store.

3. Add an additional student to existing Canvas Account

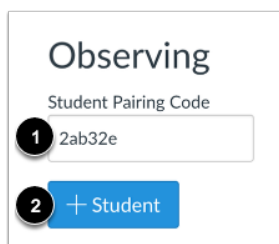

If you signed up for a Canvas account as a parent, you can add students to observe within the same institution. To link yourself to a student, you will need to enter a student-specific pairing code. Pairing codes are case sensitive and are valid for seven days. Students can generate pairing codes from their User Settings. Admins and instructors can also generate pairing codes.

First, open **User Settings**

In Global Navigation, click the Account link [1], then click the Settings link [2].

Then, open **Observing** - in user navigation, click the **Observing** link

Type in the student's pairing code and click **Add Student**.
