

Mom,

Currently, I am working on an Emerging Technology project about my family history. This class teaches us how to use new programs such as Google Drive and all sorts of internet based programs.

For this project I am making up 25 interview questions and interviewing family members. I also will be making a Family Tree via FamilyEcho. I will also be creating a prezi of 15 family members and photos of family members with interesting facts. Finally I will be making an infographic of my family. All of the programs I will be using I have learned how to use in this class. It would be very helpful if you could take your time and help me with gathering more family history to help me pursue this project and make it amazing. I would be very grateful for your help and time.

Thanks,

Austin Hurt
