The Magnification Feature on Android devices allows the user to magnify the whole screen or magnify one part of the screen.

Created by Elijah Leightcap, Vision Rehabilitation Therapist,
Bureau of Blindness and Visual Services, Philadelphia, vrtinfo.com

To set up the Magnification Feature, go to the Settings App, then to the Accessibility section, then to the Vision section, and then to the Magnification section.

You can choose between three options to turn the Magnification Feature on or off: use the accessibility button, hold both volume buttons, or quickly tap the screen three times with one finger.

To move around the screen, drag with two fingers. Pinch and zoom on the screen to adjust the magnification amount.

To use the Magnification Feature temporarily, press and hold the screen after turning the feature on. Once you are finished then lift your finger to turn off the feature.
