

Video Script Examples

Linev Systems

Video	Audio
Footage of venues, like those shown in the NPSA video .	From high-capacity football stadiums to popular music venues, these places of joy can become the scenes of nightmares.
Perhaps showing the laying of flowers (commemorations)?	Lives lost, serious injuries sustained, and communities devastated - in an instant.
Maybe featuring a clip with security guards?	The risk is all too real, with weapons, explosives, and other illegal items potentially passing human detection.
Focus on the LV Stream	But it's a risk that can be minimised with Linev's X-ray screening system.
Bags being passed through the LV Stream	Based on real-world feedback and testing, the LV Stream meets the need for high-speed baggage screening.
	Driven by AI, this X-ray system allows for high throughput at reduced cost and need for human operation.
LV Stream being used for the scanning of items, like in this video	Made for multi-location use, it ensures the continuous flow of visitors with no compromise of security.
People entering a venue, having had their baggage checked	So you can avoid the queuing risk, have confidence in threat detection, and create a safer space for your visitors.
Linev logo in combination with the LV Stream (and contact details?)	Get in touch and book your LV Stream demo now!

Insite

The management of multiple store locations is tough.

Tracking and monitoring inventory, marketing activity, and other assets is time-consuming and costly.

And pulling essential data from multiple systems is massively inefficient.

But it doesn't have to be this way.

Meet Insite.

Insite is **the** estate and project management tool that gives you a complete, top-down view of your entire physical estate.

The powerful Insite dashboard gives you real-time inventory monitoring and asset tracking.

So you can easily keep all of your marketing materials up to date, on brand and in suitable locations.

And keep on top of compliance, with smart, data-driven decisions that grow your business.

Powered by Insite, you'll have complete visibility and control of your entire estate, all on one easy to use platform.

Get in touch and book your Insite demo today.

Everything Education

You know how important it is to achieve good school grades. Unfortunately, it can be a challenge to find the kinds of learning resources sure to make a difference. But you can count on Everything Education for in-person and online tuition across the key subjects of English, Maths and Science.

Having studied to Bachelors, Masters and PGCE, our tutors have a love of their subjects and of learning. Taking a fun and engaging approach, they're able to transform what might otherwise be a boring and challenging process into one of inspired achievement.

Offering unlimited 24/7 access to the student portal, we provide the opportunity for learning in the preferred style. With bite-sized videos, resources, and tasks, it's everything you expect from school, plus a whole lot more.

Make the smart choice and enrol with Everything Education today!

Wired Glass

There's a big risk when it comes to using the same display screen or projector with both OFFICIAL and above OFFICIAL IT equipment.

Online attacks of OFFICIAL systems typically involve the use of malware to infect your computer. From here, the malware could attack the screen and then the SECRET system, with the return path being exposed for the theft of SECRET data.

The impact could be immense, especially where a monitor is being used by multiple computers.

It's enough to make you rethink the connection of laptops with untrusted projectors and screens.

The use of clunky workarounds and obsolete technology might seem the only option.

Forced to buy monitors for each computer system, you could end up sacrificing money, space and usability.

And that's not to mention the harmful environmental impacts.

But it doesn't have to be this way.

Initiate has developed WIRED GLASS - a small form factor and low power display protection device that prevents attacks via digital video connections.

Purpose made for office environments where multiple IT systems share a display screen, WIRED GLASS protects the monitor against attack from the host computer, and vice versa.

It does this by validating commands, with data being transferred across the video cable.

By ensuring the one-way stream of video across either HDMI or DisplayPort connections, it effectively limits the risk of malicious data theft.

With WIRED GLASS as a safeguard you won't have to worry about what-if data breach scenarios.

Get in touch with Initiate for more information.

MA Workforce Management Solutions

There's no denying the challenge of sourcing high-quality tech talent. The lack of resources and budget make it tough to connect with the best-fit candidates. And that's not to mention the difficulty of navigating compliance challenges.

But you can avoid such high-cost recruitment issues with MA workforce management solutions. As a leading tech recruitment company, we have specialist expertise in the sourcing, compliance, and management of specialist tech staff.

Drawing on local labour market experience, our consultants will work with you to create a tailored and scalable talent strategy. We offer ready access to a wide and diverse international community of talent aligned with your business needs.

MA workforce management solutions offer support in everything from the management of international payments to the project-based recruitment of talent. You can expect financial savings, improved efficiency, and compliance, no matter your industry or international location.

Get in touch today to find out more about our range of workforce management solutions.

MA Connect

So, you want to give your business the best chance of evolution through the attraction and retention of quality tech staff.

But you don't have access to the kind of network needed to stand out in a competitive market.

And you don't have the benefit of expert knowledge on key topics such as the selection of tech stack partners.

That's where MA Connect comes in. Drawing on more than 40 years of experience, we're able to provide essential insights for the development of valuable communities and partnerships.

As an MA Connect member, you'll have the opportunity to engage with a talent ecosystem full of diverse knowledge for the growth of your business.

We'll support you in the building of long-lasting and productive collaborations with the best tech-stack partners.

Plus, you'll gain exclusive access to a 160k IT freelancer community, with ready support for continued career success.

Get in touch today and find out more about the business-enhancing prospects of registering with MA Connect.

BCS - Chartered Institute for IT

T Levels, the new qualifications for 16-19 year olds, help students into skilled employment, higher study, or Apprenticeships.

BCS - The Chartered Institute For IT, has launched a new programme to support providers of digital T Levels and to help their students progress to achieve professional recognition.

In return for a cohort-dependent annual charge, you'll be entitled to free BCS membership for one member of staff, inclusive of access to CPD resources and BCS communities of employers.

Support program membership includes regular updates on the digital industries as well as key insights and support in the development of desirable professional behaviours. And with BCS accreditation and affiliation you'll benefit from greater credibility and T-level relevance.

The interactive BCS Provider Hub features a map with around 3,000 relevant links to T-level resources. Plus we'll give you a bank of employer-designed resources, ideal for classroom use.

With free engagement and membership for up to four years, T-level students can be sure of meeting and exceeding employer expectations.

They will gain essential tech-sector knowledge with access to a student hub complete with expert learning resources. And there'll be plenty of opportunities to network with peers and experienced industry professionals.

With free part RITTech recognition on course completion and full registration after 12-18 months in a digital role, all T-level graduates are sure to get a head start on their chosen career path.

Help your students Get Ahead, Get Recognised
