Good _____,

I am _____ a _____ Class Senator with the Student Government Association. As a member of the Academic Affairs committee, I am interested in hearing your thoughts on one of our projects. We are currently considering a project to promote the addition of syllabi on SIS during course registration. From your experience do you feel this would be a beneficial idea? Do you feel most professors would only be able to post the previous semester's syllabus or the most recent? Do you have any other thoughts on ways in which to improve student understanding of courses during the registration period? Thank you for all that you do.

Sincerely,

____
