

I'm a social worker with Correctional Service Canada. I have been a steward since 2017. I've been particularly involved in responding to all members on working environment issues, resolving conflicts with the employer and helping to find real solutions to harassment situations.

It was with commitment and conviction that I took part in the last two bargaining rounds. In a teamwork context, I believe I have contributed to the defence of all professions. Those who know me can testify to my commitment and determination.

I was a member of the CSC National Consultation Team, 2019/2024. This allowed me to explore certain issues in greater depth and to realize what an important source of information these consultation teams represent. So I've built up a good network of contacts across departments, provinces and professions.

I am committed to continuing my work to consolidate this information network to support our negotiation processes, in the interests of all professions.

Thank you for your trust,

Donald Moisan
